The Board of Trustees The West Virginia Consolidated Public Retirement Board 4101 MacCorkle Ave, S.E. Charleston, West Virginia 25304

Dear Board Members:

It is with great pleasure that we submit our Comprehensive Annual Financial Report (CAFR) of the West Virginia Consolidated Public Retirement Board (WVCPRB) for the fiscal year ended June 30, 2017. The West Virginia Consolidated Public Retirement Board includes the Public Employees Retirement System, the Teachers Retirement System, the Teachers Defined Contribution Retirement System, the State Police Death, Disability Retirement System, the State Police Retirement System, the Judges Retirement System, the Emergency Medical Service Retirement System and the Municipal Police Officers & Firefighters System. Each system is considered a component unit of the State of West Virginia for financial reporting purposes, and, as such, the financial information contained in this report is also included in the State of West Virginia's Comprehensive Annual Financial Report.

Responsibility for both the accuracy of the data, and the completeness and fairness of the presentation including all disclosures, rests with the management of the Systems. Sufficient internal controls exist to provide reasonable assurance regarding the safekeeping of assets and fair presentation of the financial statements, supporting schedules, and statistical tables. Because the cost of a control should not exceed the benefits to be derived, the objective is to provide reasonable, rather than absolute assurance, that the financial statements are free of any material misstatements. We trust that you and the respective members of the Systems will find this report helpful in understanding your retirement system.

#### **Administration and Plan History**

The PERS, TRS, TDCRS, SPDDRS, DSRS, EMSRS, MPFRS, SPRS and JRS operate under common management and are collectively referred to as The West Virginia Consolidated Public Retirement Board. In addition to executive management, these plans share accounting and information services, the costs of which are allocated to the funds on an equitable basis. The plans were established under various provisions of the Legislature to provide benefits to qualified persons employed by State-supported institutions, entities and components. Additional information regarding the administration and history of each system, including laws establishing the plan and services provided, can be found in the *Financial Section-Notes to the Financial Statements* portion of this report.

#### **Financial Information**

Accounting Method - As required by Generally Accepted Accounting Principles (GAAP), the financial information of the PERS, TRS, SPDDRS, TDCRS, DSRS, EMSRS, MPFRS, SPRS and JRS is reported on the accrual basis of accounting. Revenues are recognized when earned and expenses are recognized when the corresponding liability is incurred. Investments are reported at fair value.

*Internal Controls* - The WVCPRB maintains a system of internal controls designed to provide reasonable assurance that assets are properly safeguarded, transactions are properly executed, and financial statements are reliable. Because the cost of internal control should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements.

*Summary Comparative Data* - Management's Discussion and Analysis (MD&A) includes a narrative introduction, an overview of the financial statements, including the notes and required supplementary information, and summary comparative data for fiscal years 2017 and 2016. Also, an analysis of significant variances between fiscal years 2017 and 2016 is provided in the MD&A.

#### **Plan Funded Position**

The funding objective of the WVCPRB pension trust funds is to meet long-term benefit requirements through contributions, which remain relatively level as a percent of member payroll over time, and through investment earnings. During the year ended June 30, 2017 the funded ratios (based on actuarial valuations completed as of July 1, 2016) of the 8 defined benefit plans administered by the WVCPRB showed 7 plans with a decrease and 1 plan with an increase (due to smoothing methodology). The decreases were due to negative returns in the investment market during the 2016 fiscal year. The funding percentages for PERS, TRS, SPDDRS, SPRS, DSRS, JRS, EMSRS and MPFRS for fiscal 2017 (based on actuarial valuations completed as of July 1, 2016) were 89.0%, 65.4%, 79.4%, 95.3%, 90.0%, 155.1%, 88.3% and 161.4%, respectively. Historical information concerning funding progress is presented in the *actuarial section* for each plan.

#### **Investment Activity**

Total investments for the WVCPRB increased in fiscal year 2017, primarily due to both a increase in the fair market value of the investments and the income they produced. The total assets for PERS, TRS, SPDDRS, SPRS, DSRS, JRS, EMSRS, MPFRS and TDCRS at June 30, 2017 were \$6.386 billion, \$7.291 billion, \$641.75 million, \$166.69 million, \$200.83 million, \$189.96 million, \$71.16 million, \$5.50 million and \$477.51 million respectively compared to investment balances for the PERS, TRS, SPDDRS, SPRS, DSRS, JRS, EMSRS, MPFRS and TDCRS of \$5.697 billion, \$6.543 billion, \$578.93 million, \$138.57 million, \$173.27 million, \$167.19 million, \$59.32 million, \$3.32 million and \$430.1 million, respectively, for the fiscal year ended June 30, 2016.

Yields for PERS, TRS, SPDDRS, SPRS, DSRS, JRS, EMSRS, MPFRS and TDCRS during fiscal year 2017 were 15.82%; 15.70%; 15.71%; 15.86%; 15.83%; 15.88%; 15.87%; 15.50% and 11.72% respectively, compared to (0.12)%; (0.28)%; (0.21)%; 0.07%; (0.04)%; (0.10)%; 0.03%; 1.13% and 1.07% during fiscal year 2016.

Interest and dividend income for the PERS, TRS, SPDDRS, SPRS, DSRS, JRS, EMSRS, MPFRS and TDCRS for the fiscal year ended June 30, 2017, was \$53.29 million, \$60.54 million, \$5.36 million, \$1.41 million, \$1.69 million, \$1.62 million, \$595 thousand, \$40 thousand and \$14.64 million respectively, compared to \$25.65 million, \$29.71 million, \$2.63 million, \$630 thousand, \$792 thousand, \$772 thousand, \$266 thousand, \$11 thousand and \$18.31 million, respectively, for the fiscal year ended June 30, 2016. The change in fair market value of investments for the PERS, TRS, SPDDRS, SPRS, DSRS, JRS, EMSRS, MPFRS and TDCRS for the fiscal year 2017 was \$821.81 million, \$934.56 million, \$82.44 million, \$20.94 million, \$25.59 million, \$24.65 million, \$8.91 million, \$(48.12) million, \$(3.86) million, \$(539) thousand, \$(856) thousands, \$(947) thousand, \$(248) thousand, \$17 thousand and \$(14.77) million, respectively, for fiscal year 2016. Additional information concerning investments, including investment policies and procedures, is located in the investment section of this Comprehensive Annual Financial Report.

#### Management's Discussion and Analysis

GASB Statement No. 34 requires that management provide a narrative introduction, overview, and analysis to accompany the Financial Statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is intended to compliment the MD&A and should be read in conjunction with it. The MD&A can be found immediately following the Independent Auditor's Report.

#### **Professional Services**

Professional consultants are engaged by the Board to perform certain professional services that are essential to the effective operation of the respective plans. The Certification letters form the independent actuary, in conjunction with our internal actuary, are included in this report. The professional consultants engaged by the Board are listed in the Introductory Section of this report.

#### **Financial Statement Audit**

Suttle and Stalnaker, PLLC, Certified Public Accountants, issued an unmodified ("clean") opinion on the West Virginia Consolidated Public Retirement Board's financial statements for the fiscal year ended June 30, 2017. The independent auditor's report is located at the front of the Financial Section of this report.

#### **Highlights and Initiatives**

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the West Virginia Consolidated Public Retirement Board for its comprehensive annual financial report for the fiscal year ended June 30, 2016. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

During fiscal year 2015, the WVCPRB began the process of designing our new computer system that, when completed, will enhance the experience of the members and retirees as well as expand the reporting capabilities and increase the efficiency in the administration of the plans. The first phase of our computer project, named COMPASS, "went live" in the first quarter of calendar year 2016 and the second phase "went live" in the second quarter of calendar year 2017.

#### **Acknowledgments**

The compilation of this report reflects the combined effort of the staff of the West Virginia Consolidated Public Retirement Board under the leadership of its Executive Director and the Guidance of the Board Members. It is intended to provide extensive and reliable information as a basis for making management decisions, determining compliance with legal provisions, and determining responsible stewardship of the funds of the PERS, TRS, SPDDRS, SPRS, DSRS, JRS, EMSRS, MPFRS and TDCRS.

We would like to take this opportunity to express our gratitude to the staff, the Governor, the Board of Trustees, the legislature, the consultants, and the many people who have worked so diligently through continued cooperative efforts to assure the successful operation and financial soundness of the PERS, TRS, SPDDRS, SPRS, DSRS, JRS, EMSRS, MPFRS and TDCRS systems.

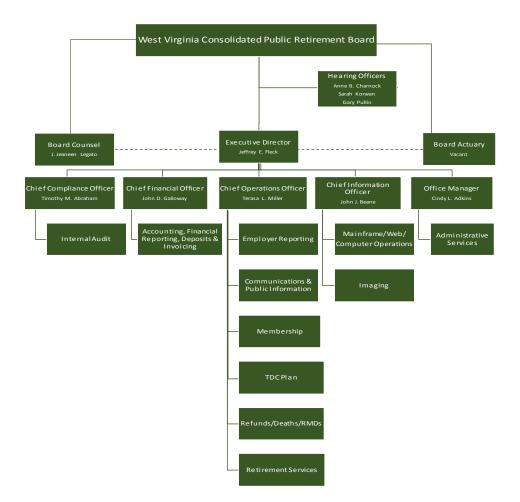

Sincerely,

E. Flerk

Jeffery E. Fleck Executive Director

#### **INDEPENDENT AUDITOR'S REPORT**

To the Members of the West Virginia Consolidated Public Retirement Board Charleston, West Virginia

#### **Report on the Financial Statements**

We have audited the accompanying financial statements of each of the pension funds (pension trust funds of the State of West Virginia) of the West Virginia Consolidated Public Retirement Board (the Board) as of and for the years ended June 30, 2017 and 2016, and the related notes to the financial statements, which collectively comprise the Board's basic financial statements as listed in the table of contents.

#### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

#### **Opinions**

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of each of the pension funds of the Board, as of June 30, 2017 and 2016, and the respective changes in financial position thereof for the years then ended in accordance with accounting principles generally accepted in the United States of America.

#### **Emphasis of Matter**

As discussed in Note 1, the financial statements present only the pension trust funds of the State of West Virginia and do not purport to, and do not present fairly the financial position of the State of West Virginia, as of June 30, 2017 and 2016, the changes in its financial position, or, where applicable, its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

#### **Other Matters**

#### Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis on pages 15 through 20, the schedules of net pension liability and changes in net pension liability, schedules of contributions, schedules of investment returns, and the accompanying notes to the required supplementary information presented on pages 75 through 80 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

#### **Other Information**

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Board's basic financial statements. The introductory section, schedule of administrative expenses, schedule of payments to consultants, investment section, actuarial section, and statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The schedule of administrative expenses and schedule of payments to consultants are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedule of administrative expenses and schedule of payments to consultants are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory section, investments section, actuarial section, and statistical section have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

uttle + Stalnaker, PUC

Charleston, West Virginia January 31, 2018

The Management of the West Virginia Consolidated Public Retirement Board (WV CPRB) provides this discussion and analysis as an overview of the WV CPRB's financial activities for the fiscal years ended June 30, 2017 and June 30, 2016. This section should be read in conjunction with the Independent Auditor's Report, the audited financial statements, and the accompanying notes to the financial statements.

# FINANCIAL HIGHLIGHTS

- The net position restricted for pensions (total assets minus total liabilities) of the WV CPRB at June 30, 2017 was approximately \$15.42 billion, increasing over \$1.6 billion (11.89%) from the plan net position restricted for pensions at June 30, 2016. The net position restricted for pensions of the Board at June 30, 2016 was approximately \$13.78 billion, decreasing over \$432 million (-3.0%) from the net position restricted for pensions at June 30, 2015. The net position restricted for pensions is held in trust to meet future benefit obligations.
- Contribution revenue for fiscal year 2017 totaled approximately \$832.72 million, an increase of .90% compared to fiscal year 2016. Contribution revenue for fiscal year 2016 totaled approximately \$825.31 million, a decrease of 8.6% compared to fiscal year 2015. The fluctuations from 2016 to 2017 were due to changes in the employer contribution rates and an increase in other statutorily required contribution amounts.
- Net investment income (loss) for fiscal years 2017 and 2016 were approximately \$2.1 billion and \$(23) million, respectively.
- Total benefits, refunds, and forfeitures paid for fiscal year 2017 were approximately \$1.283 billion, an increase of 4.38% over fiscal year 2016 total benefits, refunds, and forfeitures paid of approximately \$1.229 billion, which was an increase of 5.54% over fiscal year 2015.
- Total administrative expenses for fiscal year 2017 were approximately \$11.14 million, as compared to approximately \$11.09 million in 2016. This represented a .51% increase over the prior year. From 2015 to 2016 administrative expenses increased 5.43%

# **OVERVIEW OF THE FINANCIAL STATEMENTS**

The WV CPRB financial statements consist of the *Statements of Fiduciary Net Position - Pension Funds, Statements of Changes in Fiduciary Net Position - Pension Funds,* and the *Notes to the Financial Statements.* In addition, *Required Supplementary Information* is presented, which includes this *Management's Discussion and Analysis.* 

The Statements of Fiduciary Net Position - Pension Funds and the Statements of Changes in Fiduciary Net Position - Pension Funds report information about the fiduciary net position as of the end of the fiscal year and the changes in fiduciary net position during the fiscal year. These statements include all assets and liabilities using the accrual basis of accounting. Under the accrual basis of accounting, the current year's additions and deductions are included in the financial activity, regardless of when cash is received or paid. The difference between the total assets and total liabilities on the Statements of Fiduciary Net Position - Pension Funds, or net position restricted for pensions, provides a measurement of the financial position of the WV CPRB as of the end of the fiscal year. The Statements of Changes in Fiduciary Net Position - Pension Funds provide information on the activities that caused the financial position to change during the fiscal year. Over time, increases or decreases in the net position restricted for pensions of the WV CPRB are one indicator of the whether the systems' financial health is improving or deteriorating.

### **OVERVIEW OF THE FINANCIAL STATEMENTS (Continued)**

In addition to the basic financial statements, the reader should also review the Required Supplementary Information, which includes the *Schedules of Net Pension Liability and Changes in Net Pension Liability, Schedules of Contributions*, and *Schedules of Investment Returns* to gain an understanding of the funded status of the WV CPRB over time. These schedules provide an indication of the WV CPRB's ability to meet both the current and future benefit payment obligations. The *Notes to the Financial Statements* are also essential to the reader's understanding of the financial statements and provide additional information regarding the WV CPRB, such as descriptions of the plans administered by the WV CPRB, including contribution and benefit provisions, and information about the accounting policies and investment activities.

## ANALYSIS OF ASSETS, LIABILITIES AND NET POSITION RESTRICTED FOR PENSIONS

At June 30, 2017, the WV CPRB had net position restricted for pensions of approximately \$15.42 billion, an increase of over \$1.64 billion (11.89%) from approximately \$13.78 billion at June 30, 2016. This followed the fiscal year 2016 decrease of approximately \$432 million (-3.0%) from the approximately \$14.22 billion of net position restricted for pensions as of June 30, 2015. The assets of the WV CPRB consist primarily of investments. The increase in net position restricted for pensions is primarily the result of investment returns in equity markets. Condensed financial information comparing the WV CPRB plan assets for the past three fiscal years follows.

#### **CONDENSED FIDUCIARY NET POSITION (in thousands)**

### ANALYSIS OF ADDITIONS AND DEDUCTIONS TO NET POSITION RESTRICTED FOR PENSIONS

Contributions to WV CPRB increased approximately \$7.41 million (.90%) compared to fiscal year 2016. With the increase in investment income of approximately \$2.1 billion for fiscal year 2017 compared to investment income for fiscal year 2016, the overall increase in revenues for 2017 was (263.06%) compared to revenues for fiscal year 2016.

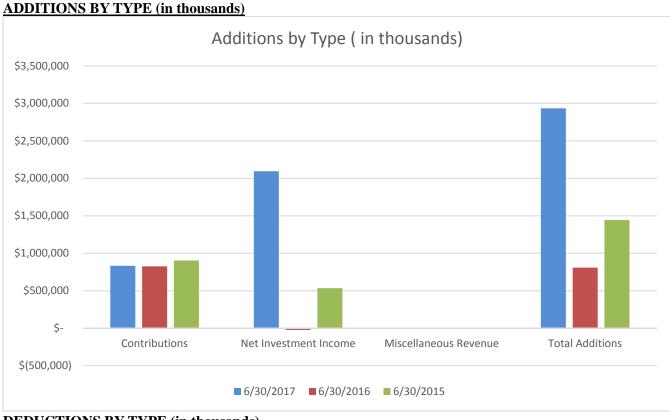

Contributions to the WV CPRB for fiscal year 2016 decreased by approximately \$78 million (-8.64%) over contributions for fiscal year 2015. With the decrease of net investment income of approximately \$557 million (-104.31%) for fiscal year 2016 compared to investment income for fiscal year 2015, the overall decrease in revenues for 2016 was (-44.01%) compared to revenues for fiscal year 2015.

Total benefits, refunds, and forfeitures paid during the year ended June 30, 2017 were approximately \$1.283 billion, an increase of (4.38%) over fiscal year 2016 total benefits, refunds, and forfeitures paid. Total benefits and refunds paid during the year ended June 30, 2016 were approximately \$1.229 billion, an increase of (5.54%) over fiscal year 2015. The increase in benefit expenses for each year is attributed to more retirees receiving benefits during the fiscal years. Total refunds paid increased approximately \$618 thousand (1.55%) in fiscal year 2017 from fiscal year 2016. Total refunds paid had increased approximately \$3.59 million (14.3%) in fiscal year 2016 over fiscal year 2015.

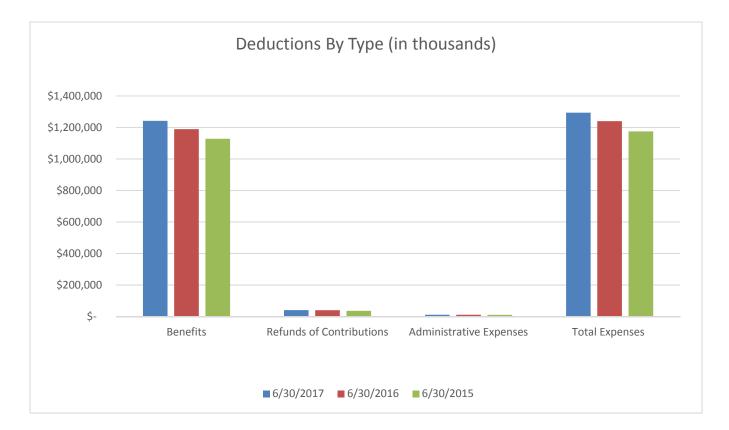

Administrative expenses for the year ended June 30, 2017 were approximately \$11.14 million, an increase of (.51%) from fiscal year 2016 administrative expenses. Administrative expenses for the year ended June 30, 2016 were approximately \$11.1 million, an increase of (5.4%) over fiscal year 2015 administrative expenses. The increase each year was primarily due to budgetary increases deemed necessary for several expense areas, namely the new Line of Business software implemented during 2017.

# **DEDUCTIONS BY TYPE (in thousands)**

### ECONOMIC FACTORS, FUTURE FUNDING PROVISIONS, OVERALL OUTLOOK

The defined benefit plans are funded with the expectation that they will return 7.5 percent on the invested assets. When that return is not achieved, there is an increase in the net pension liability. The turmoil in the capital markets in fiscal year 2009 and the subsequent negative return for invested assets increased the net pension liability causing an increase in employer contributions in previous years.

The average investment return for all retirement plans for fiscal 2017 was 15.8% which exceeded our 7.5% target rate. In aggregate, the funds have a five year annualized rates of return at 9.9% which is above the 7.5% long term expectation. The 10 year annualized rate of return is below our target of 7.5% at 6.0%.

## **1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

<u>Reporting Entity</u> - During fiscal year 1991, the West Virginia State Legislature created the Consolidated Public Retirement Board (the Board) to administer nine of the State of West Virginia's ten retirement plans. The nine retirement plans included within these financial statements are the Public Employees' Retirement System (PERS), the Teachers' Retirement System (TRS), the State Police Death, Disability and Retirement System (SPDDRS), the State Police Retirement System (SPRS), the Deputy Sheriff Retirement System (DSRS), the Judges' Retirement System (JRS), the Emergency Medical Services Retirement System (EMSRS), Municipal Police Officers and Firefighters Retirement System (MPFRS) and the Teachers' Defined Contribution Retirement System (TDCRS). The Total Pension Funds column included in the statements of fiduciary net position and statements of changes in fiduciary net position is for informational purposes only. The assets of each plan are only available to satisfy the obligations of that plan. The Board's retirement plans are reported as pension trust funds by the State of West Virginia (the State). The Governmental Employees Deferred Compensation Plan is administered by the West Virginia State Treasurer's Office and has been excluded from these financial statements in accordance with Governmental Accounting Standards Board (GASB) Statement No. 32, Accounting and Financial Reporting for Internal Revenue Code Section 457 Deferred Compensation Plans.

The Board is managed by a Board of Trustees, which consists of, by virtue of their position, the Governor, State Auditor, State Treasurer, and Secretary of the Department of Administration, together with the following gubernatorial appointments that are subject to the advice and consent of the State Senate: four residents of the State who are not participants in the retirement plans, one State and one non-State employee participant in PERS, and one participant each from TRS, SPDDRS, SPRS, DSRS, EMSRS, MPFRS and TDCRS.

Pursuant to the West Virginia Code, the Board submits a detailed budgetary schedule of administrative expenses to the Secretary of the Department of Administration prior to the beginning of each fiscal year. The fundamental purpose of budgetary control is to plan for the expected level of operations and to provide management with a tool to control deviation from such plan but does not constitute a legally adopted budget.

<u>Basis of Accounting - Revenue Recognition</u> - The financial statements of the Board have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) as applied to governmental units. The Governmental Accounting Standards Board (GASB) is the accepted standard setting body for establishing governmental accounting and financial reporting principles for governmental units. The accompanying pension fund financial statements have been prepared using the economic resources measurement focus and the accrual basis of accounting. Plan member contributions are recognized in the period when contributions are due. Employer contributions to the plan are recognized when due and the employer has made a formal commitment to provide contributions. Benefits and refunds are recognized when due and payable in accordance with the terms of each plan. The Board's assets are held primarily in accounts maintained by the State Treasurer, the West Virginia Investment Management Board (the WVIMB), and the third-party administrator of its defined contribution plan (Empower).

<u>Cash</u> - The State Treasurer has statutory responsibility for the daily cash management activities of the state's agencies, departments, boards and commissions. The amounts on deposit with the State Treasurer are available for immediate withdrawal and, accordingly, are presented as cash and cash equivalents in the accompanying financial statements.

<u>Investments</u> - All defined benefit plan funds not required to meet disbursement needs are invested in accordance with the West Virginia Code, as well as policies established by the WVIMB. The WVIMB has established various investment pools to provide for the investment of the defined benefit plans' assets. These investment pools are structured as multiparticipant variable net asset funds.

The investments in the WVIMB Pools are carried at fair value using the net asset value per share (or its equivalent) as a practical method.

The TDCRS investments are held by an investment company which also serves as the third-party administrator for the plan. As prescribed by West Virginia Code, the TDCRS investments are allocated to participant accounts and the participants direct the investment of their individual account balances by selecting from a list of plan mutual funds or a long term fixed investment option.

#### 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

The TDCRS investments are carried at fair value (except for fully benefit-responsive investment contracts, which are reported at contract value) as determined by a third-party pricing service utilized by an investment management company. For fully benefit-responsive investment contracts, contract value is the relevant measure for the portion of investments attributable to fully benefit-responsive investment contracts because contract value is the amount participants normally would receive if they were to initiate permitted transactions under the terms of the plan. Investment income for the TDCRS is determined monthly and distributed to the individual participant accounts.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for further discussion regarding the fair value of the Board's investments.

<u>Contributions Receivable</u> - Contributions receivable represent funds owed to the Board from other government employer or non-government employer entities participating in the various retirement plans.

<u>Participant Loans Receivable</u> - The TRS and DSRS make loans to its members, hired prior to July 1, 2005, up to the lesser of one-half of a member's accumulated contributions or \$8,000, at an interest rate indexed to the interest rate used by the Board for determining actuarial contribution levels. TRS and DSRS loans require repayment over varying terms, with a maximum term of five years and a minimum period of six months.

During the 2008 First Special Session, the West Virginia Legislature passed House Bill 101 regarding retirement benefits for teachers and educational service personnel which became effective March 16, 2008. The legislation provided an opportunity for members of the Teachers' Defined Contribution Retirement System (TDCRS) to elect to transfer to the West Virginia Teachers' Retirement System (TRS). The transfer occurred on July 1, 2008 and a total of 15,152 TDCRS members transferred to TRS. These members were granted 75% service created under TRS for their years of service in TDCRS. These members were also granted a one-time opportunity to receive a loan in order to purchase the additional 25% service credit at a 7.5% interest rate and with a maximum term of five years. The last day to receive such a loan was June 30, 2010.

<u>Accrued Expenses and Other Payables</u> - Accrued expenses and other payables primarily represent retirement annuity amounts due to new retirees.

<u>Investment Related Expenses</u> - Investments are invested in multiparticipant pools and investment related expenses are not readily separable by participant in each pool. Investment income from the pools is reported net of investment expenses.

<u>Accounting Estimates</u> - The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and disclosure of actuarial accrued liabilities, contingent assets, and contingent liabilities as of the financial statement date, and the reported amounts of additions and deductions for the reporting period. Actual amounts could differ from those estimates.

The various retirement plans utilize various investment instruments. Investment securities, in general, are exposed to various risks, such as interest rate, credit, and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the value of investment securities will occur in the near term and that such change could materially affect the amounts reported in the statements of fiduciary net position. Changes in the value of investment securities could affect the future funding status of the plans or require additional contributions to maintain the current funding status.

#### 2 - PLAN DESCRIPTIONS AND CONTRIBUTION INFORMATION

Membership in the plans consisted of the following as of July 1, 2017 and 2016:

As of July 1, 2017:

Funding policies for all plans have been established by and are changed from time-to-time by action of the State Legislature. While contribution rates are legislatively determined, actuarial valuations are performed to assist the Board and the State Legislature in determining contribution rates. The following information is provided for general information purposes only. Plan participants should refer to the respective West Virginia State Code Section for more complete information.

#### **Defined Benefit Plans**

#### Public Employees' Retirement System

*Plan Description* - PERS is a multiple employer defined benefit cost sharing public employee retirement system covering substantially all employees of the State and its component units, as well as employees of participating non-State governmental entities who are not participants of another state or municipal retirement system. The numbers of participating employers are as follows:

|                              | June 30, 2017 | June 30, 2016 |
|------------------------------|---------------|---------------|
| West Virginia state agencies | 138           | 134           |
| Cities and towns             | 118           | 116           |
| Counties                     | 55            | 55            |
| Special districts            | <u>344</u>    | <u>341</u>    |
|                              | <u>655</u>    | <u>646</u>    |

#### 2 - PLAN DESCRIPTIONS AND CONTRIBUTION INFORMATION (Continued)

PERS provides retirement benefits as well as death and disability benefits. Qualification for normal retirement is age 60 with five years of service or at least age 55 with age and service equal to 80 or greater. A member may retire with the pension reduced actuarially if the member is at least age 55 and has at least 10 years of contributory service, or at any age with 30 years of contributory service. For all employees hired after July 1, 2015, qualification for normal retirement is age 62 with 10 years of service. A member hired after July 1, 2015 may retire with the pension reduced actuarially if the member is between ages 60 and 62 with at least ten years of contributory service, between ages 57 and 62 with at least twenty years of contributory service, or between ages 55 and 62 with at least thirty years of contributory service. The straight life annuity retirement benefit is equivalent to 2% of average salary multiplied by years of service. Average salary is the average of the three consecutive highest annual earnings out of the last fifteen years of earnings. For all employees hired after July 1, 2015, average salary is the average of the five consecutive highest annual earnings out of the last fifteen years of earnings. Terminated members with at least five years of contributory service who do not withdraw their accumulated contributions may elect to receive their retirement annuity beginning at age 62. For all employees hired after July 1, 2015, this age increases to 64 with at least ten years of contributory service.

Chapter 5, Article 10 of the West Virginia State Code assigns the authority to establish and amend the provisions of the plan to the State Legislature. In certain circumstances, this Article also permits members of TRS to transfer accumulated service credit and member contributions into PERS.

*Contributions* - Per Chapter 5, Article 10, for periods prior to July 1, 2015, the members contribute 4.5% of annual earnings. Effective July 1, 2015, newly hired members contribute 6% of annual earnings. State and non-state governmental employers' contribution rates were 12.0% and 13.5% of covered employees' annual earnings for fiscal years ending June 30, 2017 and 2016, respectively. Effective July 1, 2017 the employer contribution rate decreased to 11% of members' annual earnings. Contributions as a percentage of payroll for members are established by statutes, subject to legislative limitations and are not actuarially determined. Contributions as a percentage of payroll for employers are established by the Board. Employer contributions from State and non-State agencies for the fiscal years ended June 30, 2017 and 2016, were (in thousands):

|                    |           | 2017              |           | 2016                     |
|--------------------|-----------|-------------------|-----------|--------------------------|
| State<br>Non-State | \$        | 109,742<br>55,934 | \$        | 125,089<br><u>61,681</u> |
|                    | <u>\$</u> | 165,676           | <u>\$</u> | 186,770                  |

#### Teachers' Retirement System

*Plan Description* - TRS is a multiple employer defined benefit cost sharing public employee retirement system covering all full-time employees of the 55 county public school systems in the State and certain personnel of the 13 State-supported institutions of higher education, State Department of Education and the Higher Education Policy Commission hired prior to July 1, 1991. Employees of the State-supported institutions of higher education Policy Commission hired after June 30, 1991, are required to participate in the Higher Education Retirement System. TRS closed membership to new hires effective July 1, 1991. However, effective July 1, 2005, all new employees hired for the first time are required to participate in TRS. There were 79 employers and one non-employer contributing entity participating in TRS as of June 30, 2017.

During the 2008 First Special Session, the West Virginia Legislature passed House Bill 101 regarding retirement benefits for teachers and educational service personnel which became effective March 16, 2008. The legislation provided an opportunity for members of the Teachers' Defined Contribution Retirement System (TDCRS) to elect to transfer to the West Virginia Teachers' Retirement System (TRS). The transfer occurred on July 1, 2008 and a total of 15,152 TDCRS members transferred to TRS.

### 2 - PLAN DESCRIPTIONS AND CONTRIBUTION INFORMATION (Continued)

TRS provides retirement benefits as well as death and disability benefits. A member is eligible for normal retirement at age 60 with five years of service, age 55 with 30 years of service or any age with 35 years of service. A member may retire with the pension reduced actuarially if the member is less than age 55 and has between 30 and 35 years of service. For all employees hired after July 1, 2015, qualification for normal retirement is age 62 with 10 years of service. All members hired after July 1, 2015 may retire with the pension reduced actuarially if the member is between ages 60 and 62 with 10 years of service or between ages 55 and 62 with 30 years of service. Terminated members with at least five, but less than 20, years of credited service who do not withdraw their accumulated contributions are entitled to a deferred retirement commencing at age 60. For all employees hired after July 1, 2015, this age increases to 64 with ten years of service, or age 63 with 20 years of service. Retirement benefits are equivalent to 2% of average annual salary multiplied by years of service. Average salary is the average of the 5 highest fiscal years of earnings during the last 15 fiscal years of earnings.

Chapter 18, Article 7A of the West Virginia State Code assigns the authority to establish and amend the provisions of the plan to the State Legislature.

*Contributions* - A member who withdraws from service for any cause other than death or retirement may request that the accumulated employee contributions plus interest be refunded.

TRS funding policy provides for member contributions based on 6% of members' gross salary. Contributions as a percentage of payroll for members and employers are established by State law and are not actuarially determined. Employers make the following contributions:

The State, county boards of education, and other employers contribute 15% of gross salary of their TRS members hired prior to July 1, 1991. The State, county boards of education, and other employers contribute 7.5% of the gross salary of their TRS covered employees hired for the first time after July 1, 2005 and for those TDCRS members who selected to transfer to TRS effective July 1, 2008. The other employers and county boards of education, utilizing funds made available through the State's School Aid Formula (SAF) contribute 7.5% of the gross salary of their TDCRS covered employees. In addition, the State contributes a certain percentage of fire insurance premiums paid by State residents to assist in extinguishing the TRS unfunded liability within 40 years of June 30, 1994. Other statutorily required contributions of \$282,501,656 and \$255,042,149 were made through the State's school aid formula during the years ended June 30, 2017 and 2016, respectively. Certain additional contributions of approximately \$37,656,000 and \$34,472,000 were made during the years ended June 30, 2017 and 2016, respectively, representing extra appropriations to reduce the unfunded liability.

### State Police Death, Disability and Retirement System

*Plan Description* - SPDDRS is a single employer defined benefit public employee retirement system covering all West Virginia State Police (State Police) hired on or before March 11, 1994. This plan is closed to new entrants.

SPDDRS provides retirement benefits as well as death and disability benefits. A member is eligible for normal retirement at age 50 after 20 years of contributory service, or at any age upon completion of 25 years of service. There is no vesting in the State's contributions prior to ten years of service. Benefits payable to members retiring prior to age 50 are deferred until the normal retirement date. The annual retirement benefit is 5.5% of the members' aggregate salary, but not less than \$6,000 per year. Total service related disability benefits are equal to the member's annual salary, but not less than \$15,000 per year. Aggregate salary is the total salary paid to a member during his or her period of service, which may include up to 5 years of active military service credited at the average departmental salary. Aggregate salary for purposes of determining disability benefits may include salary that would have been earned had the participant served at least 25 years notwithstanding the disability retirees, the adjustment of 3.75% is granted to retirees and beneficiaries. For service-connected total disability retirees, the adjustment begins at age 65. A member who terminates employment is entitled to a refund of his or her contributions plus interest.

### 2 - PLAN DESCRIPTIONS AND CONTRIBUTION INFORMATION (Continued)

*Contributions* - SPDDRS funding policy provides for member contributions based on 9% of their annual earnings. The State makes contributions based on 15% of the annual payroll of State Police, as well as contributing all revenue generated by the sale of traffic accident reports, criminal investigation reports and other fees. In addition, certain additional contributions of approximately \$16,875,000 and \$13,209,000 were made during the years ended June 30, 2017 and 2016, respectively, representing extra appropriations to reduce the unfunded liability. Contributions, as a percentage of payroll for members and the employer, are established by State law and are not actuarially determined.

### State Police Retirement System

*Plan Description* - SPRS is a single employer defined benefit public employee retirement system that was established for all State Police hired on or after March 12, 1994. SPRS provides retirement, death, and disability benefits. A member is eligible for normal retirement at age 50 with 25 years of service or age 52 with 20 years of credited service. A member is eligible for a reduced benefit with 20 years of credited service and retiring before age 52. The annual regular retirement benefit, paid monthly, is equal to 2.75% of the final average salary multiplied by the years of service. Final average salary is the average of the five highest calendar years of earnings during the last ten years of earnings. Annual retirement annuity adjustments are 1.0% for regular retirement and are payable on July 1 of each year after the member reaches 63 years of age.

*Contributions* - Members contribute 12% of annual base salary. Employer contribution rates were 12.0% of covered employees' annual base salary for fiscal years ending June 30, 2017 and 2016. Effective July 1, 2017, the employer contribution rate increased to 14% of covered employees' annual base salary.

Chapter 15, Article 2 and Article 2A of the West Virginia State Code assigns the authority to establish and amend the provisions of the SPDDRS and SPRS plans to the State Legislature.

### Deputy Sheriff Retirement System

*Plan Description* - DSRS, a multiple employer defined benefit cost sharing public employee retirement system, was established for all deputy sheriffs hired by all 55 county governments on or after July 1, 1998. The DSRS was also made available to any deputy sheriff employed in covered employment participating in PERS on the effective date so long as he/she made notification in writing before January 31, 1999, to both the County Commission in the county in which he/she was employed and the Board of his/her desire to transfer to the DSRS. Approximately 600 deputy sheriffs elected such transfer and as a result, approximately \$28,638,000 of accumulated member and employer contributions and interest were transferred from PERS to DSRS in fiscal year 1999, in accordance with Chapter 7, Article 14D of the West Virginia State Code. There were 55 employers participating in DSRS as of June 30, 2017.

DSRS provides retirement as well as death and disability benefits. A member is eligible for normal retirement under the following circumstances:

- 1. Member is in covered employment, with attainment of at least age 55 with age plus service equal to 70 or greater
- 2. Member is in covered employment, has attained the age of 60 years, and has completed five or more years of service
- 3. Attainment of the age of 50 and completion of 20 or more years of service
- 4. Attainment of the age of 62 years and has completed five or more years of service

The annual regular retirement benefit is equal to 2.25% of a member's final average salary multiplied by the member's years of credited service. Final average salary refers to the average of the highest annual compensation received for covered employment by the member during any five consecutive plan years within the member's last ten years of service. A member may elect to receive retirement income payments equal to his/her accrued benefit in the normal form or in a variety of annuity options. The normal form signifies a monthly annuity which is 1/12 of the amount of a members accrued benefit which is payable for the member's life.

## 2 - PLAN DESCRIPTIONS AND CONTRIBUTION INFORMATION (Continued)

Benefit payments did not begin prior to January 1, 2000, except benefit payments resulting from disability.

Chapter 7, Article 14D of the West Virginia State Code assigns the authority to establish and amend the provisions of the plan to the State Legislature.

*Contributions* - Members contribute 8.5% of monthly base salary, and the Sheriff's Office/County Commission of the County in which the member is employed contributed an additional 12% of the member's monthly salary during both the years ended June 30, 2017 and 2016. In addition, the Sheriff's Office/County Commissions contribute certain fees charged for reports and other services provided by the sheriff's offices.

### Judges' Retirement System

*Plan Description* - JRS is a single employer defined benefit public employee retirement system covering State judges and justices who elect to participate. JRS provides retirement as well as death and disability benefits. A member who was appointed or elected to the bench prior to July 2, 2005 is eligible for normal retirement upon the attainment of 24 years of service of which at least 12 years is as a sitting judge or justice, 16 years of service at age 65 of which at least 12 years is as a sitting judge or justice, or 8 full years of service after age 65. A member who was appointed or elected to the bench on or after July 2, 2005 is eligible for normal retirement upon the attainment of 24 years is as a sitting judge or justice, or 16 years of service at age 65 of which at least 14 years is as a sitting judge or justice, or 16 years of service at age 65 of which 14 years is as a sitting judge or justice. A member of 24 years of service is as a sitting judge or justice. A member of the bench on or after July 2, 2005 is eligible for a deferred benefit at age 65 provided the member completes 16 years of service of which 12 years of service is as a sitting judge or justice. A member of the bench on or after July 2, 2005 is eligible for a deferred benefit at age 65 provided the member completes 16 years of service of which 12 years of service is as a sitting judge or justice. A member of the bench on or after July 2, 2005 is eligible for a deferred benefit at age 65 provided the member completes 16 years of service of which 12 years of service is as a sitting judge or justice. A member of the bench on or after July 2, 2005 is eligible for a deferred benefit at age 65 provided the member completes 16 years of service.

The annual benefit paid to judges and justices appointed or elected prior to July 2, 2005 is 75% of the current annual salary of the office from which the participant retires, with surviving spouse and dependent child benefits. This benefit is proportionally increased upon increase in salary for active sitting judges and justices.

The annual benefit paid to judges and justices appointed or elected on or after July 2, 2005 is 75% of the member's final average salary. Final average salary means the average of the highest thirty-six consecutive month's compensation received as a judge or justice. No increases in benefits are given by virtue of increase in salary of active sitting judges or justices.

Chapter 51, Article 9 of the West Virginia State Code assigns the authority to establish and amend the provisions of the plan to the State Legislature.

*Contributions* - JRS funding policy provides for member contributions based on 7% of their annual earnings. This policy also provides for periodic employer contributions at varying amounts appropriated annually by the State Legislature. However, annual appropriations are determined in consideration of the most recent actuarial valuation. Any participant who terminates before becoming eligible for benefits may elect to withdraw his or her contributions without interest.

#### Emergency Medical Services Retirement System (EMSRS)

*Plan Description* - EMSRS is a multiple employer defined benefit cost sharing retirement system. The EMSRS Act was passed by the Legislature in March 2007. The legislation provided for a voluntary participation election of eligible emergency medical service officers and mandated that certain participation levels be reached by December 31, 2007, in order for the provisions of the Emergency Medical Services Retirement System to become effective. At the close of the election period, fifteen licensed EMS public employers, consisting of twelve eligible Public Employees Retirement System (PERS) political subdivisions and three eligible Non-PERS political subdivisions, passed corporate resolutions to become participating public employers of this retirement system. Statewide, over five hundred eligible Emergency Medical Services Officers elected to opt into this new retirement plan. The WV Emergency Medical Services Retirement System (EMSRS) became effective January 1, 2008. There were 14 employers participating in EMSRS as of June 30, 2017.

## 2 - PLAN DESCRIPTIONS AND CONTRIBUTION INFORMATION (Continued)

The statute prohibited any payout of benefits from the EMSRS fund prior to January 1, 2011, with the exception of duty disability retirement. An EMSRS member is eligible for "normal" retirement when one of the following occurs:

- Attainment of age 50 and the completion of 20 years of contributory service; or
- Attainment of age 50 when age plus contributory service equals 70 while still in covered employment; or
- Attainment of age 60 and completion of 10 years contributory service while still in covered employment; or
- Attainment of age 62 and completion of 5 years of contributory service.

An EMSRS member is eligible for "early retirement" when they reach age 45 and have completed 20 years of service.

Final Average Salary (FAS) is the average of the highest annual compensation received by the member during covered employment for any 5 consecutive plan years (Jan. 1- Dec. 31) within the last 10 years of service. The accrued benefit on behalf of any member is calculated as follows:

Final Average Salary x Years of Credited Service x Benefit Percentage

### Annual Retirement Benefit Formula

2.75% x FAS x Years of Service for years 1-20 2.00% x FAS x Years of Service for years 21-25 1.50% x FAS x Years of Service for years 26+

Chapter 16, Article 5V of the West Virginia State Code assigns the authority to establish and amend the provisions of the plan to the State Legislature.

*Contributions* - Currently, the EMSRS employee contribution rate is 8.5% of gross monthly salary and the employer contribution rate is 10.5% of gross monthly salary.

### Municipal Police Officers and Firefighters Retirement System (MPFRS)

*Plan Description* - MPFRS is a multiple employer defined benefit cost sharing plan. The MPFRS Act was passed by the Legislature in November 2009, and became effective January 1, 2010. The legislation provided for any municipality or municipal subdivision employing municipal police officers or firefighters to elect to become a participating employer. MPFRS is a multiple employer defined benefit retirement system. The MPFRS had 275 participating members as of June 30, 2017. All police officers and firefighters first employed in covered employment after the date the municipality or municipal subdivision elected to join MPFRS are required to be members of MPFRS. There were 21employers participating in MPFRS as of June 30, 2017.

A MPFRS member is eligible for "normal" retirement when one of the following occurs:

- Attainment of age 50 and the completion of 20 years of contributory service; or
- Attainment of age 50 when age plus contributory service equals 70 while still in covered employment; or
- Attainment of age 60 and completion of 10 years contributory service while still in covered employment; or
- Attainment of age 62 and completion of 5 years of contributory service.

Final Average Salary (FAS) is the average of the highest annual compensation received by the member during covered employment for any 5 consecutive plan years (Jan. 1 - Dec. 31) within the last 10 years of service. The accrued benefit on behalf of any member is calculated as follows, not to exceed 67%:

Final Average Salary x Years of Credited Service x Benefit Percentage

## 2 - PLAN DESCRIPTIONS AND CONTRIBUTION INFORMATION (Continued)

### Annual Retirement Benefit Formula

2.6% x FAS x Years of Credited Service for years 1-20 2.0% x FAS x Years of Credited Service for years 21-25 1.0% x FAS x Years if Credited Service for years 26-30

Chapter 8, Article 22A of the West Virginia State Code assigns the authority to establish and amend the provisions of the plan to the State Legislature.

*Contributions* - Currently, the MPFRS employee contribution rate is 8.5% of gross monthly salary and the employer contribution rate is 8.5% of gross monthly salary.

### **Teachers' Defined Contribution Retirement System**

*Plan Description* - TDCRS is a multiple employer defined contribution retirement system, which is a money purchase pension plan covering primarily full-time employees of the State's 55 county public school systems, the State Department of Education, and the Schools for the Deaf and Blind who were hired between July 1, 1991 and June 30, 2005. TDCRS members also include former TRS plan members, including higher education employees, who have elected to transfer into or participate in TDCRS. TDCRS benefits depend solely on amounts contributed to the plan plus investment earnings. Employees are eligible to participate from the date of employment. TDCRS closed participation to new members effective June 30, 2005.

During the 2008 First Special Session, the West Virginia Legislature passed House Bill 101 regarding retirement benefits for teachers and educational service personnel which became effective March 16, 2008. The legislation provided an opportunity for members of the Teachers' Defined Contribution Retirement System (TDCRS) to elect to transfer to the West Virginia Teachers' Retirement System (TRS). The transfer occurred on July 1, 2008 and a total of 15,152 TDCRS members transferred to TRS.

The TDCRS provides members with a choice of 20 separate investment options made up of fixed income, balanced, large cap, mid cap, small cap, and international mutual funds, a money market fund and a fixed annuity.

*Contributions* - State law requires employees to contribute 4.5% of their gross compensation and the employers to contribute 7.5% of covered members' gross compensation. Employer contributions are comprised from amounts allocated to the employers through the State's School Aid Formula, forfeitures allotted from the TDCRS and county contributions. Employer contributions for each employee (and interest allocated to the employee's account) become partially vested after six years and fully vested after 12 complete years of service. If a terminated employee does not return to active participant status within five years, the nonvested employer contributions and earnings thereon are forfeited to reduce the employer's current period contribution requirement. Any such forfeitures arising from contributions, plus earnings thereon, will be used to reduce future employer contributions.

## **3 - ACTUARIAL INFORMATION - DEFINED BENEFIT PLANS**

The total pension liabilities for financial reporting purposes were determined by actuarial valuations as of July 1, 2016 and 2015 and rolled forward to June 30, 2017 and 2016, respectively, using the actuarial assumptions and methods described in the *Actuarial Assumptions and Methods* section of this note.

### **3 - ACTUARIAL INFORMATION - DEFINED BENEFIT PLANS (Continued)**

## Schedule of Net Pension Liability

The schedules of net pension liability and changes in net pension liability, presented as required supplemental information (RSI) following the notes to the financial statements, present trend information about whether the actuarial values of plan fiduciary net position are increasing or decreasing over time relative to the actuarial values of the total pension liability. Selected information for each plan as of June 30, 2017 and 2016 were as follows (in thousands):

| As of June 30, 2017: | Total<br>Pension<br><u>Liability</u> | Plan<br>Fiduciary<br>Net<br><u>Position</u> | Liat | Net<br>Pension<br>pility (Asset) | Plan Fiduciary<br>Net Position<br>as a Percentage<br>of the Total<br><u>Pension Liability</u> |
|----------------------|--------------------------------------|---|------|----------------------------------|---|

## 3 - ACTUARIAL INFORMATION - DEFINED BENEFIT PLANS (Continued)

#### Long-Term Expected Rates of Return

The long-term rates of return on pension plan investments were determined using the building block method in which estimates of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentages and by adding expected inflation. Best estimates of long-term geometric rates of return are summarized in the following tables and were used for all defined benefit plans for the years ended June 30, 2017 and 2016:

| Asset Class             | Target<br>Allocation | Long-term<br>Expected<br>Rate of<br>Return | Weighted<br>Average<br>Expected<br>Real Rate of<br>Return |
|-------------------------|----------------------|--|---|
| US Equity               | 27.5%                | 7.0%                                       | 1.92%   |
| International Equity    | 27.5%                | 7.7%                                       | 2.12%   |
| Core Fixed Income       | 7.5%                 | 2.7%                                       | 0.20%   |
| High Yield Fixed Income | 7.5%                 | 5.5%                                       | 0.41%   |
| TIPS                    | 0.0%                 | 2.7%                                       | 0.00%   |
| Real Estate             | 10.0%                | 7.0%                                       | 0.70%   |
| Private Equity          | 10.0%                | 9.4%                                       | 0.94%   |
| Hedge Funds             | 10.0%                | 4.7%                                       | 0.47%   |
| Total                   | 100.0%               |  | 6.76%   |
| Inflation (CPI)         |                      |  | 1.90%   |
| · · /                   |                      |  | 8.66%   |

#### **Discount Rate**

The discount rate used to measure the total pension liability was 7.5% for all defined benefit plans for fiscal years 2017 and 2016. The projections of cash flows used to determine the discount rates assumed that employer contributions will continue to follow the current funding policies. Based on those assumptions, the fiduciary net position of each defined benefit pension plan was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rates of return on pension plan investments were applied to all periods of projected benefit payments to determine the total pension liabilities of each plan.

## 3 - ACTUARIAL INFORMATION - DEFINED BENEFIT PLANS (Continued)

Regarding the sensitivity of the net pension liability to changes in the discount rate, the following table presents the plans' net pension liabilities calculated using the current discount rate of 7.5% as well as the plans' net pension liabilities if they were calculated using a discount rate that is one percentage point lower or one percentage point higher as of June 30, 2017 and 2016, respectively (in thousands):

|                      | Total Net Pension Liability (Asset) |            |               |           |             |           |
|----------------------|-------------------------------------|------------|---------------|-----------|-------------|-----------|
|                      |                                     |            |               | Current   |             |           |
|                      | 19                                  | 6 Decrease | Discount Rate |           | 1% Increase |           |
|                      |                                     | (6.5%)     | (7.5%)        |           | (8.5%)      |           |
| As of June 30, 2017: |                                     |            |               |           |             |           |
| PERS                 | \$                                  | 1,194,983  | \$            | 431,645   | \$          | (213,751) |

## 3 - ACTUARIAL INFORMATION - DEFINED BENEFIT PLANS (Continued)

### Annual Money-Weighted Rates of Return

The following table provides the annual money-weighted rates of return, net of investment expenses, for the years ending June 30, 2017 and 2016, respectively, for each defined benefit pension plan:

|        | Annual Money<br>Weighted Rate of Return |        |  |
|--------|---|--------|--|
|        | 2017                                    | 2016   |  |
| PERS   | 15.82%                                  | -0.12% |  |
| TRS    | 15.70%                                  | -0.28% |  |
| SPDDRS | 15.71%                                  | -0.21% |  |
| SPRS   | 15.86%                                  | 0.07%  |  |
| DSRS   | 15.83%                                  | -0.04% |  |
| JRS    | 15.88%                                  | -0.10% |  |
| EMS    | 15.87%                                  | 0.03%  |  |
| MPFRS  | 15.72%                                  | 1.13%  |  |

## Actuarial Assumptions and Methods

Significant assumptions used in the actuarial valuations are as follows:

| PERS                                       | June 30, 2017   | June 30, 2016  |

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy under are described as follows:

- Level 1 Inputs to the valuation methodology are unadjusted quoted prices in active markets for identical assets or liabilities that the Board can access at the measurement date.
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, such as: quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

### 4 - FAIR VALUE MEASUREMENTS

The asset or liabilities fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of observable inputs and minimize the use of unobservable inputs.

The investment risks for the pooled investments in which the Board participates in are described in Note 5. Investments are administered by the IMB, for the Board's defined benefit plans, and the IMB is responsible for setting investment risk policies.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes to the methodologies used at June 30, 2017:

*Mutual funds*: Valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily net asset value (NAV) and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

*Collective investment trusts*: Valued at the NAV of units of a collective trust. The NAV, as provided by the trustee, is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities. This practical expedient is not used when it is determined to be probable that the fund will sell the investment for an amount different than the reported NAV. Participant transactions (purchases and sales) may occur daily. Were the Plan to initiate a full redemption of the collective trust, the investment adviser reserves the right to temporarily delay withdrawal from the trust in order to ensure that securities liquidations will be carried out in an orderly business manner.

*IMB Investment Pools*: Valued at the NAV of units of an investment pool. The NAV, as provided by the trustee, is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities. This practical expedient is not used when it is determined to be probable that the fund will sell the investment for an amount different than the reported NAV. Participant transactions (purchases and sales) may occur daily. Refer to the fair value measurement not disclosures within the IMB's annual financial statements for the underlying investments within the fair value hierarchy.

The following is a summary of the investments held by IMB for each plan as of June 30, 2017 and 2016 (in thousands) which are all measured at NAV and not within the fair value hierarchy:

### 4 - FAIR VALUE MEASUREMENTS (Continued)

#### INVESTMENTS MEASURED USING NAV PER SHARE AS PRACTICAL EXPEDIENT

The following table summarizes investments for which fair value is measured using the net asset value per share practical expedient as of June 30, 2017, and 2016, respectively. There are no participant redemption restrictions for these investments.

|                              |                 |                     |             | Redemption    |            |

(b) The object of each fund is to seek capital appreciation and income.

### **5 - INVESTMENTS**

The Board has adopted investment guidelines that are consistent with those specified in the West Virginia Code. Those guidelines authorize the Board to invest with IMB in obligations of the United States and certain of its agencies, certificates of deposit, direct and general obligations of states, repurchase agreements relating to certain securities, equity securities, real estate, and guaranteed investment contracts. Plan assets of the defined benefit plans are invested by the IMB. The IMB invests plan assets in accordance with West Virginia Code and policies established by the IMB. Individual defined benefit plan assets are invested by the IMB in the various IMB pools. Investments are managed by a third party administrator as the trustee for the TDCRS.

The investment risks for the various investments in which the plans participate are described below:

### Large Cap Equity

The Pool's objective is to exceed, net of external investment management fees, the S&P 500 Stock Index over three to five year periods. Assets are managed by INTECH Investment Management, LLC, and State Street Global Advisors.

The Pool is exposed to credit risk from certain investments made with cash collateral for securities loaned. This risk is limited by requiring minimum ratings on debt instruments. Long-term debt instruments must be rated A or better by Moody's or Standard & Poor's at the time of purchase. Short-term debt instruments must be rated P-1 by Moody's or A-1 by Standard & Poor's at the time of purchase. The Pool is exposed to interest rate risk from certain investments made with cash collateral for securities loaned is not to exceed 90 days. The following table provides the weighted average credit ratings and weighted average maturities (WAM) as of June 30, 2017 (in thousands).

|         |                   | WAM                          |  |   | Total   |

| Total investments            |         |     | \$ 3,721,403 | 100.0%               |

This table includes investments received as collateral for repurchase agreements with a fair value of \$332,025 (in thousands) as compared to the amortized cost of the repurchase agreements of \$314,482 (in thousands).

The following table provides the WAM for the investments made with cash collateral for securities loaned as of June 30, 2016 (in thousands).

|                       | June 30, 2016 |            |  |  |  |  |  |
|-----------------------|---------------|------------|--|--|--|--|--|
| Investment Type       | Fair Value    | WAM (days) |  |  |  |  |  |
| Asset backed issues   | \$ -          | -          |  |  |  |  |  |
| Repurchase agreements | 314,482       | 2          |  |  |  |  |  |
| Time deposits         | 105,545       | 1          |  |  |  |  |  |
| Total                 | \$ 420,027    | 1          |  |  |  |  |  |

#### Concentration of Credit Risk

The Pool is restricted from investing more than 5 percent of the value of the Pool in any one company. At June 30, 2017 and 2016, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk.

### Custodial Credit Risk

At June 30, 2017 and 2016, the Pool held no securities that were subject to custodial credit risk. Repurchase agreements, when held, are collateralized to a minimum of 102 percent and the collateral is held in the name of the IMB. Securities on loan are collateralized to a minimum of 102 percent and the collateral is held by the IMB's custodian in the name of the IMB. All remaining securities are held by the IMB's custodian in the name of the IMB.

#### Foreign Currency Risk

The Pool is exposed to no or minimal foreign currency risk.

### 5 - INVESTMENTS (Continued)

#### Non-Large Cap Equity

The Pool invests in the equities of small- to mid-sized companies and its objective is to exceed, net of external investment management fees, the Russell 2500 Index over three- to five-year periods. Assets are managed by AJO and Westfield Capital Management (Westfield).

### Credit Risk and Interest Rate Risk

The Pool is exposed to credit risk from certain investments made with cash collateral for securities loaned. This risk is limited by requiring minimum ratings on debt instruments. Long-term debt instruments must be rated A or better by Moody's or Standard & Poor's at the time of purchase. Short-term debt instruments must be rated P-1 by Moody's or A-1 by Standard & Poor's at the time of purchase. The Pool is exposed to interest rate risk from certain investments made with cash collateral for securities loaned. The weighted average maturity for investments made with cash collateral for securities loaned is not to exceed 90 days. The following table provides the weighted average credit ratings and weighted average maturities (WAM) as of June 30, 2017 (in thousands).

This table includes investments received as collateral for repurchase agreements with a fair value of \$231,116 (in thousands) as compared to the amortized cost of the repurchase agreements of \$218,904 (in thousands).

## 5 - INVESTMENTS (Continued)

### Non-Large Cap Equity (continued)

The following table provides the WAM for the investments made with cash collateral for securities loaned as of June 30, 2016 (in thousands).

|                       | June 30, 2016 |            |  |  |  |
|-----------------------|---------------|------------|--|--|--|
| Investment Type       | Fair Value    | WAM (days) |  |  |  |
| Asset backed issues   | \$ -          | -          |  |  |  |
| Repurchase agreements | 218,904       | 2          |  |  |  |
| Time Deposits         | 73,468        | 1          |  |  |  |
| Total                 | \$ 292,372    | 1          |  |  |  |

#### Concentration of Credit Risk

The Pool is restricted from investing more than 5 percent of the value of the Pool in any one company. At June 30, 2017 and 2016, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk.

### Custodial Credit Risk

At June 30, 2017 and 2016, the Pool held no securities that were subject to custodial credit risk. Repurchase agreements, when held, are collateralized to a minimum of 102 percent and the collateral is held in the name of the IMB. Securities on loan are collateralized to a minimum of 102 percent and the collateral is held by the IMB's custodian in the name of the IMB. All remaining securities are held by the IMB's custodian in the name of the IMB.

#### Foreign Currency Risk

The Pool is exposed to no or minimal foreign currency risk.

#### International Qualified

The Pool invests in The Silchester International Investors International Value Equity Group Trust (Silchester). The Pool's objective is to produce investment returns that exceed the Morgan Stanley Capital International's Europe Australasia Far East Index by 200 basis points on an annualized basis over three- to five-year periods, net of external investment management fees. Only "qualified participants" (as defined by the *Internal Revenue Code*) may invest in the Pool. Silchester invests in a diversified developed country, non-U.S. equity, bottom-up value oriented portfolio of securities with limited exposure to emerging markets and no unreasonable concentration exposure to any single issuer or country. Redemptions from Silchester can be made monthly with ten days advance written notice. Redemptions will generally be made within seven business days following month-end.

The Pool invests in a collective trust fund that invests in equities denominated in foreign currencies. The value of this investment at June 30, 2017 and 2016, was \$1,453,466 (in thousands) and \$1,208,025 (in thousands), respectively. This investment, although denominated in U.S. dollars, is exposed to foreign currency risk through the underlying investments. The Pool is not exposed to credit risk, interest rate risk, custodial credit risk, or concentration of credit risk.

### 5 - INVESTMENTS (Continued)

#### International Equity

The Pool invests in the equities of international companies. Assets are managed by Acadian Asset Management, LLC (Acadian), Axiom International Investors, LLC (Axiom), Brandes Investment Partners, L.P. (Brandes), LSV Asset Management (LSV), and Oberweis Asset Management, Inc (Oberweis). The objective of the Pool is to exceed, net of external investment management fees, Morgan Stanley Capital International's All Country World Free Ex US Index over three- to five-year periods.

### Credit Risk and Interest Rate Risk

The Pool is exposed to credit risk from investments made with cash collateral for securities loaned. This risk is limited by requiring minimum ratings on debt instruments. Long-term debt instruments must be rated A or better by Moody's or Standard & Poor's at the time of purchase. Short-term debt instruments must be rated P-1 by Moody's or A-1 by Standard & Poor's at the time of purchase. The Pool is exposed to interest rate risk from certain investments made with cash collateral for securities loaned. The weighted average maturity for investments made with cash collateral for securities loaned is not to exceed 90 days. The following table provides the weighted average credit ratings and weighted average maturities (WAM) as of June 30, 2017 (in thousands).

This table excludes investments held by the Pool that are denominated in U.S. dollars. The market value of the U.S. dollar denominated investments is \$531,171 (in thousands) or 17.5 percent.

### Short-Term Fixed Income

The main objective of the Pool is to maintain sufficient liquidity to fund withdrawals by the participant plans and to invest cash contributions until such time as the money can be transferred to other asset classes without sustaining capital losses. JP Morgan Investment Advisors, Inc. (JPM) manages the Pool. The Pool's investment objective, net of external investment management fees, is to meet or exceed the Citigroup ninety-day T-bill Index plus fifteen basis points.

#### Credit Risk and Interest Rate Risk

The IMB limits the exposure to credit risk in the Pool by requiring all corporate bonds to be rated AA or higher. Commercial paper must be rated A-1 by Standard & Poor's and P-1 by Moody's. Additionally, the Pool must have at least 15 percent of its assets in United States Treasury issues. The weighted average maturity of the investments of the Pool is not to exceed 60 days. The maturity of floating rate notes is assumed to be the next interest rate reset date. The following table provides information on the weighted average credit ratings and the weighted average maturities (WAM) of the Pool's investments as of June 30, 2017 (in thousands).

|                              |         |     | WAM    |      |            | Percent of<br>Total |

| U.S. Treasury bonds          |               | 74,786     | 28         |  |  |  |
|                              |               |            |            |  |  |  |
| Total investments            | \$            | 353,163    | 39         |  |  |  |

#### Concentration of Credit Risk

The Pool is restricted from investing more than 5 percent of the value of the Pool in any one corporate name. At June 30, 2017 and 2016, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk.

### Custodial Credit Risk

At June 30, 2017 and 2016, the Pool held no investments that were subject to custodial credit risk. Repurchase agreements are collateralized at 102 percent and the collateral is held in the name of the IMB. All remaining investments are held by the IMB's custodian in the name of the IMB.

#### Foreign currency risk

The Pool has no investments that are subject to foreign currency risk.

#### 5 - INVESTMENTS (Continued)

#### Total Return Fixed Income

The main objective of the Pool is to generate investment income, provide stability and diversification, but not at the expense of total return. Dodge & Cox (DAC), Franklin Templeton Investments (FTI), and Western Asset Management Company (Western) manage the Pool. The Pool's investment objective, net of external investment management fees, is to meet or exceed the Bloomberg Barclays U.S. Universal Bond Index.

#### Credit Risk and Interest Rate Risk

The IMB limits the exposure to credit risk in the Pool by maintaining at least an average rating of investment grade as defined by the Nationally Recognized Statistical Rating Organizations. The IMB monitors interest rate risk of the Pool by evaluating the effective duration of the investments in the Pool. Effective duration is a method of disclosing interest rate risk that measures the expected change in the price of a fixed income security for a 1 percent change in interest rates. The effective duration calculation takes into account the most likely timing of variable cash flows, which is particularly useful for measuring interest rate risk of callable bonds, commercial and residential mortgage-backed securities, asset-backed securities, and collateralized mortgage obligations.

The Pool invests in commercial and residential mortgage-backed securities, asset-backed securities, and collateralized mortgage obligations. The cash flows from these securities are based on the payment of the underlying collateral. The effective duration and yield to maturity of these securities are dependent on estimated prepayment assumptions that consider historical experience, market conditions and other criteria. Actual prepayments may vary with changes in interest rates. Rising interest rates often result in a slower rate of prepayments while declining rates tend to lead to faster prepayments. As a result, the fair values of these securities are highly sensitive to interest rate changes. At June 30, 2017 and 2016, the Pool held \$463,424 (in thousands) and \$407,958 (in thousands) of these securities, respectively. This represents approximately 18 and 19 percent of the value of the Pool's securities, respectively.

The following table provides the weighted average credit ratings and the weighted average effective duration for the various asset types in the Pool as of June 30, 2017 (in thousands).

|                               |         |     | Effective<br>Duration |    |          | Percent of<br>Total |

#### Concentration of Credit Risk

The Pool is restricted from investing more than 5 percent of the value of the Pool in any one corporate name. At June 30, 2017 and 2016, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk.

#### Custodial Credit Risk

At June 30, 2017 and 2016, the Pool held no securities that were subject to custodial credit risk. Repurchase agreements, when held, are collateralized at 102 percent and the collateral is held in the name of the IMB. Securities on loan are collateralized to a minimum of 102 percent and the collateral is held by the IMB's custodian in the name of the IMB. Investments in commingled funds are held in an account in the name of the IMB. All remaining securities are held by the IMB's custodian in the name of the IMB.

#### Total Return Fixed Income (continued)

#### Foreign Currency Risk

The Pool has foreign government bonds and foreign corporate bonds that are denominated in foreign currencies and are exposed to foreign currency risks. The Pool also has foreign denominated futures contracts and foreign exchange forward contracts. Additionally, the Pool has indirect exposure to foreign currency risk through its ownership interests in certain of the commingled investment pools. Approximately \$87,411 (in thousands), or 27 percent, and \$82,390 (in thousands), or 23 percent, of the commingled investment pools hold substantially all of their investments in securities denominated in foreign currencies as of June 30, 2017 and 2016, respectively. This represents approximately 3 percent and 4 percent of the value of the Pool's securities, respectively. The amounts at fair value (in U.S. dollars) of investments and cash denominated in foreign currencies as of June 30, 2017, are as follows (in thousands):

| Currency           | Investments | Cash      | Total      | Percent of Total<br>Investments<br>and Cash |
|--------------------|-------------|-----------|------------|---|
|                    | \$ 10,274   | \$ 455    | \$ 10,729  | 0.4%  |

| Japanese Yen       | 50,390      | 1,458    | 51,848     | 2.4     |
| Kenyan Shilling    | 2,149       | -        | 2,149      | 0.1     |
| Mexican Peso       | 36,421      | -        | 36,421     | 1.7     |
| Russian Ruble      | 9,159       | 588      | 9,747      | 0.4     |
| South African Rand | 4,814       | 192      | 5,006      | 0.2     |
| Turkish Lira       | 5,094       | -        | 5,094      | 0.2     |
| Ugandan Shilling   | 1,919       | -        | 1,919      | 0.1     |
| Uruguayan Peso     | 3,759       | -        | 3,759      | 0.2     |
| Zambian Kwacha     |             | 311      | 311        | 0.0     |
|                    | \$ 150,190  | \$ 8,374 | \$ 158,564 | 7.2%    |

This table excludes investments held by the Pool that are denominated in U.S. dollars. The market value of the U.S. dollar denominated investments and cash is \$2,029,009 (in thousands). This represents approximately 93 percent of the value of the Pool's investments.

#### **Opportunistic Income**

Effective April 1, 2017, this pool was renamed the Opportunistic Income Pool (Pool). It was previously named the Opportunistic Debt Pool. This change was made to reflect the expansion of permissible investments to include not only middle market direct commercial loans, but also real estate loan funds and other income focused funds that meet the objectives of the Pool.

Assets are managed by Angelo, Gordon & Co. and TCW Asset Management Company. The objective of the Pool is to generate a total net return of 7 to 8 percent over a normal market cycle (typically a 5 to 7-year period), and/or 250 basis points above the return of the Credit Suisse Leveraged Loan Index.

#### Credit Risk

The Pool is exposed to credit risk from investments in unrated direct lending funds. This risk is limited by requiring that underlying fund holdings are at least 90 percent collateralized by one or more assets of the issuer. The Pool also holds shares of a money market fund with the highest credit rating.

#### Concentration of Credit Risk

Each asset manager is restricted from investing more than 10 percent of the capital commitment in a single issuer for investments that are expected to be held longer than one year. At June 30, 2017 and 2016, the Pool was in compliance with this restriction.

### 5 - INVESTMENTS (Continued)

#### Opportunistic Income (continued)

### Custodial Credit Risk

At June 30, 2017 and 2016, the Pool held no securities that were subject to custodial credit risk.

#### Interest Rate Risk

The Pool is exposed to interest rate risk from investments in direct lending funds. The IMB manages interest rate risk of the Pool by requiring at least 80 percent of the fund holdings that mature in more than one year to have variable or floating interest rate structures.

### Foreign Currency Risk

The investments in direct lending funds might be indirectly exposed to foreign currency risk.

### Commitments

As of June 30, 2016, the IMB has made commitments to two direct lending funds (in thousands).

| Fund Classification  |            |            | Unfunded<br>Commitment |
|----------------------|------------|------------|------------------------|
| Direct lending funds | \$ 350,000 | \$ 113,111 | \$ 236,889             |

### Core Fixed Income

The main objective of the Pool is to generate investment income, provide stability and diversification, but not at the expense of total return. JP Morgan Investment Advisors, Inc. (JPM) manages this Pool. This Pool's investment objective, net of external investment management fees, is to meet or exceed the Bloomberg Barclays U.S. Aggregate Bond Index.

### Credit Risk and Interest Rate Risk

The IMB limits the exposure to credit risk in the Pool by maintaining at least an average rating of investment grade as defined by the Nationally Recognized Statistical Rating Organizations. The IMB monitors interest rate risk of the Pool by evaluating the effective duration of the investments in the Pool. Effective duration is a method of disclosing interest rate risk that measures the expected change in the price of a fixed income security for a 1 percent change in interest rates. The effective duration calculation takes into account the most likely timing of variable cash flows, which is particularly useful for measuring interest rate risk of callable bonds, commercial and residential mortgage-backed securities, asset-backed securities, and collateralized mortgage obligations.

The Pool invests in commercial and residential mortgage-backed securities, asset-backed securities, and collateralized mortgage obligations. The cash flows from these securities are based on the payment of the underlying collateral. The effective duration and yield to maturity of these securities are dependent on estimated prepayment assumptions that consider historical experience, market conditions and other criteria. Actual prepayments may vary with changes in interest rates. Rising interest rates often result in a slower rate of prepayments while declining rates tend to lead to faster prepayments. As a result, the fair values of these securities are highly sensitive to interest rate changes. At June 30, 2017, the Pool held \$440,253 of these securities. This represents approximately 40 percent of the value of the Pool's securities.

### 5 - INVESTMENTS (Continued)

### Core Fixed Income (continued)

The following table provides the weighted average credit ratings and the weighted average effective duration for the various asset types in the Pool as of June 30, 2017 (in thousands).

#### Concentration of Credit Risk

The Pool is restricted from investing more than 5 percent of the value of the Pool in any one corporate name. At June 30, 2017 and 2016, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk.

#### Custodial Credit Risk

At June 30, 2017 and 2016, the Pool held no securities that were subject to custodial credit risk. Repurchase agreements, when held, are collateralized at 102 percent and the collateral is held in the name of the IMB. Securities on loan are collateralized to a minimum of 102 percent and the collateral is held by the IMB's custodian in the name of the IMB. All remaining securities are held by the IMB's custodian in the name of the IMB.

## 5 - INVESTMENTS (Continued)

#### Core Fixed Income (continued)

### Foreign Currency Risk

None of the securities held by the Pool are exposed to foreign currency risk.

## TRS Annuity Pool

The Pool held an investment contract issued by the Variable Annuity Life Insurance Company (VALIC) strictly for the benefit of the Teachers Retirement System (TRS). On December 10, 2008, the IMB assumed responsibility for this investment as part of the restructuring of the Teachers Defined Contribution (TDC) plan, a separate retirement plan administered solely by the Consolidated Public Retirement System, whereby certain TDC participants elected to transfer the ownership of their individual TDC retirement accounts to the TRS in exchange for current participation in the TRS defined benefit plan. The final amount transferred under the contract was \$248,293 (in thousands).

The IMB initially requested the immediate redemption of the entire balance but VALIC denied the request, claiming the amounts were subject to withdrawal restrictions. Effective April 23, 2009, the IMB, while reserving its rights under the contract, executed the appropriate forms with VALIC to elect to withdraw funds under the Five Year Equal Annual Installment method. By making this election the guaranteed minimum annual yield of 4.5 percent became the fixed rate for this contract. The first four withdrawals of \$55,058 (in thousands) each occurred on May 4, 2009, 2010, 2011, and 2012. The final withdrawal of \$55,191 (in thousands) occurred on May 8, 2013. On that date, all remaining income, net of all management fees, was distributed to TRS and all units of ownership in the Pool were redeemed.

In response to VALIC's denial to allow the IMB to liquidate the contract in its entirety, the IMB sued VALIC. A three-judge arbitration panel issued its decision on April 28, 2017, and no recovery was awarded to the IMB. A notice of appeal has been filed with the West Virginia Supreme Court of Appeals. There are ongoing legal fees associated with this litigation and these expenses are accrued to the Pool. The funding for the payment of these expenses results from contributions by the TRS into the TRS Annuity Pool. No other management fees are charged to the Pool and none have been charged since the final withdrawal on May 8, 2013. Once this matter is finalized the TRS Annuity Pool will be closed

### Private Equity

The Pool holds investments in private equity funds and a commingled investment fund. Franklin Park Associates, LLC has been retained by the IMB to provide consulting services for the private equity funds. The commingled investment fund is managed by State Street Global Advisors.

The Pool holds limited partnerships, a commingled investment fund, and a money market fund with the highest credit rating. The investments in limited partnerships might be indirectly exposed to foreign currency risk, credit risk, interest rate risk, and/or custodial credit risk. The commingled investment fund is held in an account in the name of the IMB. The Pool is restricted from investing more than 10 percent of the IMB's total private equity exposure in a single fund. At June 30, 2017 and 2016, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk.

| Total                               | \$ 2,074,500        | \$ 1,131,853         | \$ 942,647             |  |  |

#### Real Estate

The Pool holds the IMB's investments in real estate investment trusts (REITs) and real estate limited partnerships and funds. Courtland Partners, Ltd. has been retained by the IMB to provide consulting services for the real estate limited partnerships and funds. The REITs are managed by CBRE Clarion Securities, LLC (CBRE) and Security Capital Research & Management Inc. (SCRM).

#### Credit Risk and Interest Rate Risk

The IMB limits the exposure to credit risk in the Pool by maintaining at least an average rating of investment grade as defined by the Nationally Recognized Statistical Rating Organizations. The IMB monitors interest rate risk of the Pool by evaluating the effective duration of the investments in the Pool. Effective duration is a method of disclosing interest rate risk that measures the expected change in the price of a fixed income security for a 1 percent change in interest rates. The effective duration calculation takes into account the most likely timing of variable cash flows, which is particularly useful for measuring interest rate risk of callable bonds.

#### Real Estate (continued)

The following table provides the weighted average effective duration for the various asset types in the Pool as of June 30, 2016 (in thousands).

| Investment Type                            | Fair Value   | Effective<br>Duration<br>(years) |
|--|--------------|----------------------------------|
| Common stock                               | \$ 109,014   | N/A                              |
| Money market mutual funds                  | 70,652       | N/A                              |
| Real estate limited partnerships and funds | 1,314,563    | N/A                              |
| Repurchase agreements                      | 19,708       | 0.0                              |
| Time deposits                              | 6,614        | 0.0                              |
| U.S. corporate bonds                       | 8,083        | 2.5                              |
| U.S. preferred stock                       | 12,767       | 2.2                              |
| Total investments                          | \$ 1,541,401 | 1.0                              |

Investments in real estate limited partnerships and funds and common stocks do not have an effective duration.

#### Concentration of Credit Risk

The Pool's investments in real estate limited partnerships and funds might be indirectly exposed to concentration of credit risk.

#### Custodial Credit Risk

At June 30, 2017 and 2016, the Pool held no securities that were directly subject to custodial credit risk. Repurchase agreements, when held, are collateralized to a minimum of 102 percent and the collateral is held in the name of the IMB. Securities on loan are collateralized to a minimum of 102 percent and the collateral is held by the IMB's custodian in the name of the IMB. All remaining securities, except for the investments in real estate limited partnerships and funds, are held by the IMB's custodian in the name of the IMB. The investments in real estate limited partnerships and funds might be indirectly exposed to custodial credit risk.

#### Foreign Currency Risk

The Pool has real estate investment trusts and real estate limited partnerships and funds, and cash that are denominated in foreign currencies and are exposed to foreign currency risks. The amounts at fair value (in U.S. dollars) of investments denominated in foreign currencies as of June 30, 2017, are as follows (in thousands):

|                    |    |           |          |    |         | Percent of Total<br>Investments and |

## 5 - INVESTMENTS (Continued)

## Hedge Fund

The Pool was established to hold the IMB's investments in hedge funds. Albourne America, LLC has been retained by the IMB to provide consulting services for this investment strategy.

The Pool holds shares in hedge funds and shares of a money market fund with the highest credit rating. The investments in hedge funds might be indirectly exposed to foreign currency risk, credit risk, interest rate risk and/or custodial credit risk. The Pool is restricted from investing more than 10 percent of the value of the Pool with any single manager. At June 30, 2017 and 2016, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk.

#### Investments and Deposits - TDCRS

## Credit Risk

The TDCRS' investments are not rated as to credit risk.

#### Concentration of Credit Risk

As of June 30, 2017, and 2016, the TDCRS has investment balances with the following issuers which were greater than 5% of the total investment balance of the TDCRS (in thousands):

| Mutual Funds:                         |    | 2017    |    | 2017 201 |  | 2016 |
|---------------------------------------|----|---------|----|----------|--|------|
|                                       |    |         |    |          |  |      |
| Western Asset Core Plus Bond A        | \$ | 29,361  | \$ | -        |  |      |

|                                       |    |         |    |          |  |      |
|                                       | \$ | 470,828 | \$ | 423,002  |  |      |

#### Custodial Credit Risk

As of June 30, 2017, the TDCRS held no securities that were subject to custodial credit risk.

## Concentration of Credit Risk - Cash Deposits

At June 30, 2017 and 2016 TDCRS had \$4,453,000 and \$5,465,000 on deposit with the West Virginia State Treasurer's Office and \$259,000 and \$36,000 in depository accounts with financial institutions, respectively. The deposits with financial institutions, which had a bank balance of \$259,000 and \$36,000 are either insured by the Federal Deposit Insurance Corporation or collateralized with securities held in TDCRS' name by its agent.

Foreign Currency Risk

There are no securities held by TDCRS that are subject to foreign currency risk.

## 6 - INVESTMENT CONTRACT WITH INSURANCE COMPANY

The Plan maintains an investment contract with Variable Annuity Life Insurance Company (VALIC) which is a benefitresponsive individually allocated investment contract with a guaranteed rate of return. The account is credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses. The guaranteed investment contract issuer is contractually obligated to repay the principal and a specified interest rate that is guaranteed to the Plan. There are no reserves against contract value for credit risk of the contract issuer or otherwise. The crediting interest rate is based on a formula agreed upon with the issuer, but it may not be less than 4.5%. Such interest rates are reviewed quarterly for resetting.

This contract meets the fully-benefit responsive investment contract criteria and is therefore reported at contract value. Contract value is the relevant measurement attribute for that portion of the net assets available for benefits attributable to the guaranteed investment contract because that is the amount received by participants if they were to initiate permitted transactions under the terms of the Plan. Contract value, as reported to the Board by VALIC, represents contributions made under the contract, plus earnings, less participant withdrawals and administrative expenses. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value.

The value of the contract (in thousands) at June 30, 2017 and 2016 was \$133,068 and \$125,820, respectively.

## 7 - DUE FROM STATE OF WEST VIRGINIA

The State of West Virginia reached a settlement with the United States Department of Health & Human Services in January 2011, requiring additional contributions of \$20 million per year for nine years from the State of West Virginia general fund to PERS. Contributions of \$5,000,000 are due quarterly on the 15th day after each quarter end, beginning on October 15, 2011. The remaining balance of the amount due from the state was \$65,000,000 and \$85,000,000 at June 30, 2017 and 2016, respectively.

## **8 - CONTINGENCIES**

The Board is engaged in various legal actions that it considers to be in the ordinary course of business. Some of these cases involve potentially significant amounts for which legal counsel is unable to render an opinion on the outcome. Further, the financial impact of some cases is dependent upon judicial rulings in favor of petitioners and would have to be actuarially determined, inasmuch as the relief sought is an increase in the petitioners' annuity benefit. Accordingly, the financial statement impact of such cases cannot be determined at the present time. As legal actions are resolved, the Board recognizes the liability in its financial statements in the period the amount can be estimated.

## 9 - RISK MANAGEMENT

The Board is exposed to various risks of loss related to torts; theft or damage to, and destruction of assets; errors and omissions; injuries to, and illnesses of employees; medical liabilities; and natural disasters.

Health insurance coverage for the Board's employees is obtained through its participation in the West Virginia Public Employees Insurance Agency (PEIA). PEIA provides the following basic employee benefit coverage to all participants: hospital, surgical, group major medical, basic group life, accidental death, and prescription drug coverage for active and retired employees of the State of West Virginia and various related State and non-State agencies. Additionally, the Board has obtained coverage for job-related injuries through the purchase of a policy through a commercial carrier. In exchange for the payment of premiums to PEIA and a commercial carrier, the Board has transferred its risks related to health coverage for employees and job-related injuries of employees. Furthermore, the Board is a participant in the self-insured public entity risk pool administered by the Board of Risk and Insurance Management. Coverage is in the amount of \$1,000,000 per occurrence for general liability and property damage.

There have been no significant reductions in insurance coverage from the prior year. Additionally, the amount of settlements has not exceeded insurance coverage in the past three years.

## **10 - NEW ACCOUNTING PRONOUNCEMENTS**

## Newly Adopted Statements Issued by the Governmental Accounting Standards Board

The Governmental Accounting Standards Board has also issued Statement No. 74, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*, effective for fiscal years beginning after June 15, 2016. The requirements of this Statement will improve the usefulness of information about postemployment benefits other than pensions (other postemployment benefits or OPEB) included in the general purpose external financial reports of state and local governmental OPEB plans for making decisions and assessing accountability. The adoption of this GASB statement had no impact on the June 30, 2017 financial statements.

## 10 - NEW ACCOUNTING PRONOUNCEMENTS (Continued)

#### Newly Adopted Statements Issued by the Governmental Accounting Standards Board (Continued)

The Governmental Accounting Standards Board has also issued Statement No. 77, *Tax Abatement Disclosures*, effective for fiscal years beginning after December 15, 2015. The requirements of this Statement will improve financial reporting by giving users of financial statements essential information that is not consistently or comprehensively reported to the public at present. Disclosure of information about the nature and magnitude of tax abatements will make these transactions more transparent to financial statement users. As a result, users will be better equipped to understand (1) how tax abatements affect a government's future ability to raise resources and meet its financial obligations and (2) the impact those abatements have on a government's financial position and economic condition. The adoption of this GASB statement had no impact on the June 30, 2017 financial statements.

The Governmental Accounting Standards Board has also issued Statement No. 80, *Blending Requirements for Certain Component Units an amendment of GASB Statement No. 14*, effective for fiscal years beginning after June 15, 2016. The objective of this Statement is to improve financial reporting by clarifying the financial statement presentation requirements for certain component units. This Statement amends the blending requirements established in <u>paragraph 53 of Statement No. 14</u>, The Financial Reporting Entity, as amended. The adoption of this GASB statement had no impact on the June 30, 2017 financial statements.

The Governmental Accounting Standards Board has also issued Statement No. 81, *Irrevocable Split-Interest Agreements*, effective for fiscal years beginning after December 15, 2016. The objective of this Statement is to improve accounting and financial reporting for irrevocable split-interest agreements by providing recognition and measurement guidance for situations in which a government is a beneficiary of the agreement. The adoption of this GASB statement had no impact on the June 30, 2017 financial statements.

The Governmental Accounting Standards Board has also issued Statement No. 86, *Certain Debt Extinguishment Issues*, effective for fiscal years beginning after June 15, 2017. The requirements of this Statement will increase consistency in accounting and financial reporting for debt extinguishments by establishing uniform guidance for derecognizing debt that is defeased in substance, regardless of how cash and other monetary assets placed in an irrevocable trust for the purpose of extinguishing that debt were acquired. The requirements of this Statement also will enhance consistency in financial reporting of prepaid insurance related to debt that has been extinguished. In addition, this Statement will enhance the decision-usefulness of information in notes to financial statements regarding debt that has been defeased in substance. The adoption of this GASB had no impact on the June 30, 2017 financial statements.

#### Recent Statements Issued by the Governmental Accounting Standards Board

The GASB issued Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*. This statement is intended to improve accounting and financial reporting by state and local governments for postemployment benefits other than pensions (other postemployment benefits or OPEB). It also improves information provided by state and local governmental employers about financial support for OPEB that is provided by other entities. This statement is effective for fiscal year 2018, and management has not yet determined the financial statement impact of the pronouncement.

The GASB issued Statement No. 83, *Certain Asset Retirement Obligations*, which addresses accounting and financial reporting for certain asset retirement obligations. Certain asset retirement obligations are a legally enforceable liability associated with the retirement of a tangible capital asset. This statement is effective for fiscal year 2019, and management has not yet determined the financial statement impact of the pronouncement.

The GASB issued Statement No. 84, *Fiduciary Activities*, this statement is to improve guidance with the identification of fiduciary activities for accounting and financial reporting and how those activities should be reported. This statement is effective for fiscal year 2020, and management has not yet determined the financial statement impact of the pronouncement.

## 10 - NEW ACCOUNTING PRONOUNCEMENTS (Continued)

Recent Statements Issued by the Governmental Accounting Standards Board (Continued)

The GASB issued Statement No. 85, *Omnibus 2017*, this statement is to address practice issues that have been identified during the implementation and application of certain GASB Statements. This Statement addresses a variety of topics related to the blending of component units, goodwill, fair value measurement, and postemployment benefits. This statement is effective for fiscal year 2018, and management has not yet determined the financial statement impact of the pronouncement.

The GASB issued Statement No. 87, *Leases*, to improve the accounting and financial reporting for leases by governments and to increase the usefulness of the governments financial statements by requiring recognition of certain lease assets and liabilities for leases that were previously classified as operating leases. This statement is effective for fiscal year 2021, and management has not yet determined the financial statement impact of the pronouncement.

Notes:

(1) Contributions for the Teachers Retirement System include employer contributions and interest from out-of-state services and surcharges on fire and casualty insurance policies which are specifically identified to fund the plan per West Virginia State Code Section 33-3-14d and 33-33-33.

(2) Contributions for SPDDRS include employer contributions and other payments designated by WV State Code Section 15-2-26 - Payments to members for court attendance and mileage; rewards for apprehending wanted persons; fees for traffic accident reports and photographs; fees for criminal investigation reports and photographs; fees for criminal history record checks; and fees for criminal history record reviews and challenges; or from any other sources designated by the superintendent.

(3) Contributions for DSRS include employer contributions and various other fees designated for the fund from charges and fees per WV State Code Section 7-14E-2 and 17A-3-17 - Charges for obtaining reports (i.e., accident reports); fees for performing certain services (adult private employment finger printing for federal firearm permits, motor vehicle number identification, adult identification card, and photo-identification card); fees for nongovernmental background investigation reports; and fees for renewal of a Class A or G vehicle registration.

(4) The EMSRS and MPFRS do not have ten years of data available.

2 - HISTORICAL TREND INFORMATION

80

Generally accepted accounting principles require 10 years of historical trend information to be included in the various schedules of RSI that are presented. Due to changes in actuarial methods and assumptions related to the implementation of new accounting standards during fiscal years ending June 30, 2015 and 2014, historical trend information is not readily available for fiscal years ending prior to June 30, 2014 and is not presented.

## Years Ended June 30, 2017 and 2016 (in thousands)

The excess of fees collected over administrative costs incurred is allocated to reserves for information technology improvements currently in progress and other long-term costs. Fees are assessed to recover costs such that the fees collected match expenses over time.

\* Third Party Administrative fees relate to the Teacher's Defined Contribution Retirement System only

See Independent Auditor's Report.

The following were the payments to consultants for the year ended June 30, 2017:

# INVESTMENT SECTION

January 31, 2018

Consolidated Public Retirement Board 4101 MacCorkle Avenue, SE Charleston, WV 25304-1636

On behalf of the West Virginia Investment Management Board (IMB), it is with pleasure that I submit the investment section of the Consolidated Public Retirement Board's comprehensive annual financial report for the fiscal year ended June 30, 2017.

As described in more detail herein, the IMB is a public body corporate, an independent organization statutorily charged with the responsibility for investing all assets of the State of West Virginia with long time horizons. These assets include the assets of all eight of the defined benefit pension plans administered by the Consolidated Public Retirement Board. The investments are carried at fair value using the net asset value per share (or its equivalent) as a practical method. As an investment fiduciary, the IMB's only focus is to invest the assets entrusted to it in the best interest of the beneficiaries. Note that in this section, the defined benefit pension plans, as a group, are generally referred to as "Participant Plans." To a large extent, each participant plan's performance is a function of the assets in which it invests. As such, a review of asset class performance for the year may be helpful.

The first half of fiscal year 2017 began with modest improvement in growth in the U.S. and the promise of an uptick in international markets due to quantitative easing in Europe and Japan. After struggling throughout fiscal year 2016, energy gained strength through the first half of the fiscal year, but the big story was the surprise results in the U.S. presidential election. After an initial overnight plunge in futures market, U.S. equities rallied on expectations of a more pro-business regulatory environment and the possibility of large-scale fiscal stimulus. While the rally in the U.S. moderated somewhat in the second half of the fiscal year, developed and emerging economies exhibited coordinated positive growth for the first time in this recovery. Central bankers appear optimistic that markets are normalizing and seem eager to take further steps to wean their economies off easy monetary policy. In the end, U.S. stocks were up 18.5 percent (Russell 3000) for the fiscal year, although they were eclipsed by international stocks which were up 21.0 percent (MSCI AC World ex US IMI). Fixed income suffered returning 0.9 percent (Bloomberg Barclay Capital Universal), as rates rose on the strength of the economy. The private markets produced good positive performance across the board.

Page 2

The Investment Management Board enjoyed good nominal, if not relative, performance across all asset classes in fiscal year 2017. International equity and fixed income were the greatest contributors on a relative basis, if not nominal. The IMB's international equity portfolio outperformed its benchmark (MSCI AC World ex US IMI) by 4.8 percent for the fiscal year. The IMB's fixed income portfolio outperformed it benchmark (Bloomberg Barclay's Capital Universal) by 3.7 percent, driven, to a large extent, by its short duration position in the U.S., a position that had contributed significantly to sluggish performance in the prior fiscal year. Performance measurement of private market assets, which include private equity and the majority of the IMB's real estate portfolio, is not meaningful over shorter time periods. Regardless, the private equity portfolio returned 19.7 percent and the real estate portfolio returned 8.4 percent. The hedge fund portfolio, which is intended to be a diversifying component of the entire portfolio, returned 5.7 percent, short of its benchmark by 1.7 percent.

Defined benefit pension plans make up approximately 80 percent of the IMB's total assets under management. For general comparison purposes, the IMB used the Public Employees' Retirement System (PERS) as a proxy for the other pension plans because of its similarity to other statewide public pension plans throughout the nation. As of June 30, 2017, the return for PERS was 15.8 percent net of expenses for the fiscal year. Of greater significance is the longer-term performance. In that regard, over the five-year period ending June 30, 2017, the IMB's annualized return was 9.9 percent versus the base portfolio benchmark of 7.9 percent. This represents millions of dollars in value added by trustees and staff. The other defined benefit pension plans' returns for the fiscal year ending June 30, 2017, were essentially identical to PERS. Since asset allocations are virtually the same for each plan, differences in the returns for the various plans are a function of the differences in the timing of cash flows into and out of each plan and relative levels of cash equivalent securities necessary to make benefit payments.

As an investor, the IMB's capacity to generate return on assets is largely a function of growth in the world capital markets. Diversification helps reduce short-term volatility in the capital markets, what is commonly referred to as risk, but it is generally at the expense of long-term growth. Growth is the engine of returns. The IMB's asset allocation is clearly tilted towards long-term growth for those assets with long time horizons, such as defined benefit pension plans. These plans are structured to spread risk and cost over multiple generations. The correct target rate of return is one that fairly does this. While the IMB does not set that rate, it has an obligation to advise those that do. The IMB believes that the current target is achievable. That being said, the state of the capital markets will make it very difficult to achieve that rate in the near term. Central banks in the U.S., European Union and Japan have engaged in unprecedented amounts of quantitative easing, driving up asset prices and reducing risk premiums in an effort to stave off deflation. Growth has finally picked up suggesting that it may be self-sustaining. As a result, the U.S. is already weaning itself off easy monetary policy

and other markets hope to follow suit. There are dangers, however, as rates are now extraordinarily low, leaving central banks little fuel to stoke growth should economies take a downturn. Downside market potential appears to outweigh upside market potential. Regardless, the IMB's portfolio is built for the long term. We have and will continue to moderate the structure on the margins to accommodate what we believe the markets are offering, but not so much as to compromise the portfolio's ability to take advantage of the long term growth. The IMB staff looks forward to helping trustees meet the challenges as fiscal year 2018 unfolds.

Sincerely,

Craig Slaughter, JD, CFA

Executive Director/Chief Investment Officer

The West Virginia Investment Management Board came into existence in the spring of 1997 after years of hard work modernizing the State's investment management structure. This structural modernization was widely acknowledged as a necessary precursor to the passage of a constitutional referendum to allow investment in stocks. The risks were perceived to be too great to be managed by anything but a modern, professional entity.

Although the West Virginia Investment Management Board's predecessors, the West Virginia State Board of Investments and the West Virginia Trust Fund, Inc., brought about vast improvements, each had significant shortcomings. However, with the creation of the West Virginia Investment Management Board, the State achieved a balance between control and independence that helps foster efficient and prudent investment management of long-term assets well into the future.

The beginning of the modern era in investment management by the State goes back to the late 1970s with the consolidation of the investment authority for the State's defined benefit plans, employment security plans, and other assets into a newly created West Virginia State Board of Investments. One of the goals of the legislation was to achieve economies of scale by commingling like assets.

Significantly, this newly created West Virginia Board of Investments was staffed by the State Treasury and the board itself was made up of the State's Governor, Treasurer, and Auditor.

Although a step in the right direction, the initial West Virginia State Board of Investments lacked proper or sufficient control features. After a few problems in the 1980s, principally involving its short-term pool, the Consolidated Fund, the board was expanded to seven members, adding four members from the private sector including an attorney experienced in financial matters and a Certified Public Accountant.

In the fall of 1990, the Legislature took a huge leap forward by creating a staff for the West Virginia State Board of Investments separate from the staff of the Treasury. This provided clear accountability to the Board of Investments – something that did not exist previously. Other very important control features included: (1) a statutory requirement for an Internal Auditor, (2) an annual external audit by a certified public accounting firm, and (3) monthly reporting requirements to government leaders in accordance with generally accepted accounting principles. This last feature dictated that all pools with a weighted average maturity in excess of 90 days must be marked-to-market (carried at market value), something that had not been done in the 1980s.

At the same time, the West Virginia Board of Investments made its first tepid step towards a diversified portfolio to be invested in stocks domiciled in the United States. Although it made some initial stock purchases in 1993, which were subsequently liquidated at a gain, the statute was challenged and the West Virginia Supreme Court ruled that investing in equities was unconstitutional.

In 1996, in an effort to satisfy the constitutional strictures, the Legislature carved out the pension and employment security funds with long time horizons and placed them in a trust to be managed by a new entity called the West Virginia Trust Fund, Inc. The creation of the trust as a vehicle to allow investment in stocks was also challenged and was struck down, failing to satisfy the constitutional concerns of the Supreme Court. It did, however, bring about three very important changes. The Legislature, demonstrating impeccable managerial foresight, granted the West Virginia Trust Fund, Inc. control over its own budget. With the same foresight, the Legislature imposed personal fiduciary liability on the board and staff of the West Virginia Trust Fund, Inc. Of no less importance was the creation of representative roles for members of the retirement systems and employment security systems.

With the failure of the West Virginia Trust Fund, Inc., it and the West Virginia State Board of Investments were replaced in 1997 by a new entity, the present day West Virginia Investment Management Board. The basic modernization process was complete. All of the improvements made in the Board of Investments and the West Virginia Trust Fund, Inc. were incorporated into the new entity.

The Legislature, for policy reasons, transferred the Consolidated Fund on July 8, 2005 to a newly created West Virginia Board of Treasury Investments, chaired by the State Treasurer. This was widely perceived as a policy move to ensure direct governmental oversight of State general and special revenue funds. The West Virginia Investment Management Board continues to manage the retirement funds, the employment security funds, and other assets with long time horizons.

In 2007, the Legislature expanded the investable universe of assets, increasing the allowable allocation to public equity and international securities, while also providing for a significant allocation to "alternative investments," loosely defined as hedge funds and private equity. Then, in 2014, the Legislature eliminated the percentage limitations on allowable asset classes or securities, joining most of its peers in recognizing the prudent investor standard of care is the most effective control on investor behavior for institutions.

The West Virginia Investment Management Board was created during the 1997 legislative session and is cited as the West Virginia Investment Management Board Act (the Act). The legislative findings of the Act make it clear that the West Virginia Investment Management Board was intended to be a professional, apolitical, financial management organization dedicated to the interests of the State's teachers, public employees and workers in general. The Act was intended to give the West Virginia Investment Management Board "...the authority to develop, implement and maintain an efficient and modern system for the investment and management of the State's money." In order to accomplish this purpose, the Act further stated that the West Virginia Investment Management Board must "...operate as an independent board with its own full-time staff of financial professionals immune to changing political climates...." [West Virginia Code \$12-6-1(a)(b)] The Act also mandates that the assets contributed by the public employee and employer to the 401(a) Plans and the assets of the Workers' Compensation Fund and the Coal Workers' Pneumoconiosis Fund, are "declared to be irrevocable trusts, available for no use or purpose other than for the benefit of those public employees...workers, miners and their beneficiaries...." [West Virginia Code \$12-6-1(c)(d)] The West Virginia Investment Management Board is further "empowered by this Article to act as Trustee of the irrevocable trusts created by this Article, and to manage and invest other state funds." [West Virginia Code \$12-6-1a(f)]

The standard of care mandated by the Statute is that codified in the "Uniform Prudent Investor Act," Article 6C of Chapter 44 of the *West Virginia Code*. The West Virginia Investment Management Board is further subject to the following requirements:

- (a) Trustees shall discharge their duties with respect to the 401(a) Plans for the exclusive purpose of providing benefits to participants and their beneficiaries;
- (b) Trustees shall diversify fund investments so as to minimize the risk of large losses unless, under the circumstances, it is clearly prudent not to do so;
- (c) Trustees shall defray reasonable expenses of investing and operating the funds under management;
- (d) Trustees shall discharge their duties in accordance with the trust documents and instruments governing the trusts or other funds under the management insofar as the documents and instruments are consistent with provisions of this Article; and
- (e) The duties of the Board apply only with respect to those assets deposited with or otherwise held by it. [West Virginia Code §12-6-11]

Governance of the West Virginia Investment Management Board is vested, by statute, in a thirteen-member Board of Trustees. Three members of the Board serve by virtue of their office: the Governor, the Auditor, and the Treasurer. The other ten are appointed by the Governor and confirmed by the Senate. All appointees must have experience in pension management, institutional management or financial markets. In addition, one must be an attorney experienced in finance and investment matters and another must be a Certified Public Accountant. Only six of the ten appointed Trustees may be from the same political party. The Governor serves as Chairman of the Board. A Vice-Chairman is elected by the Trustees. A Secretary, who need not be a member of the Board, is also elected by the Trustees to keep a record of the proceedings of the Board.

A member of each defined benefit retirement plan is designated by the Consolidated Public Retirement Board to represent the Participant Plans' interests. Likewise, the West Virginia Insurance Commission designates a representative for the Coal Workers' Pneumoconiosis Fund and the Workers' Compensation Old Fund. Each of the Representatives may designate up to three persons to comprise a committee representing their respective plan's beneficiaries. The Representatives and Committee Members do not have a vote but have the right to be heard at the annual meetings of the Board and are subject to the same code of conduct and requirements of confidentiality that apply to the Trustees.

The day-to-day management of the West Virginia Investment Management Board is delegated to the Executive Director who is appointed by the Board and serves at its will and pleasure. The Executive Director acts as an advisor to the Board on all matters.

The staff of the West Virginia Investment Management Board is divided into two principal divisions– Investments and Operations. The Operations Division is focused on providing the back office support necessary for the organization to function on a day-to-day basis. The Investments Division is structured to devote its time and resources to staying current with new developments and research in the investment field and being prepared to apply this knowledge to the investment of assets for the West Virginia Investment Management Board.

The primary objective of the investment pools is to provide benefits to its participants and beneficiaries. Based on general beliefs about the investment return available from a well-diversified, prudently invested portfolio, the Board has adopted specific investment objectives for each Participant Plan.

In order to achieve the investment objectives for each Participant Plan, the IMB relies on prevailing financial theory. This is a philosophy that is generally characterized by prudent diversification across different asset classes (stocks, bonds, cash, non-traditional, etc.) to reduce risk, taking into account each Participant Plan's time horizon, liquidity needs, financial condition (funded status), and return objectives in determining each Participant Plan's appropriate allocation to various assets. Diversification is not just limited to asset classes although it is, generally, considered the most significant factor. Other factors, including, but not limited to, geography/country, industry, and maturity, are also considered from the Participant Plan's perspective. These factors may also dictate the extent to which the Participant Plan may be impacted by general business conditions. Importantly, the factors mentioned here are not intended to be limiting; rather, they are outlined as a general indication of the importance of diversification and customization to proper asset allocation. The Board determines the proper allocation among asset classes and managers, based on advice and analysis provided by the IMB and an external general investment consultant.

The Board recognizes that even though its investments may be subject to short-term volatility, it is critical that the IMB maintain a focus on longer time horizons for most Participant Plans, during which time the impact of shortterm market volatility generally averages out. Impulsive reactions to short-term market events are not conducive to achieving long-term investment objectives. The strategies employed for each Participant Plan factor in an acceptable level of expected volatility given the relevant time horizon and liquidity needs for that Participant Plan. This prevents ad-hoc revisions to its philosophy and policies in reaction to either speculation or short-term market fluctuations. It is important to note that the Board recognizes that markets may become dislocated due to behavioral or other factors. When major dislocations occur, the Board has allowed for minor adjustments to the asset allocation for each Participant Plan through its Allocation Committee. In order to preserve a longer-term perspective generally, however, the Board of Trustees has adopted the following formal review schedule:

| Agenda Item                                       | <b>Review Schedule</b>     |
|---|----------------------------|
| Investment Performance                            | Quarterly                  |
| Investment Policy                                 | Every Year                 |
| Allocation Ranges                                 | Every Three Years          |
| Asset Allocation Review for Each Participant Plan | At Least Every Three Years |

The Board may hire investment managers to implement its objectives. These managers will be given specific tactical roles within the overall strategic investment plan. Depending on their assignments, the managers may be judged on some or all of the following: (1) consistency of philosophy, style and key personnel, (2) performance relative to an appropriate index or proxy group, and (3) ability to add incremental value after costs. The Board and staff shall monitor performance and supervise all fund managers.

In determining the appropriate level of risk, the Board considers, in addition to its fiduciary obligations and statutory requirements, each entity's purpose and characteristics, financial condition, liquidity needs, sources and level of contributions, income and general business conditions. Based upon these many factors, the Board identifies whether a more aggressive or more conservative approach is warranted, on an individual plan-by-plan basis. Performance is calculated using the time-weighted rate of return methodology based on market rate of return.

## **INVESTMENT OBJECTIVES**

"The Board, at its annual meeting...shall review, establish and modify, if necessary, the investment objectives of the individual participant plans, as incorporated in the investment policy statements of the respective trusts so as to provide for the financial security of the trust funds giving consideration to the following: (1) Preservation of Capital; (2) Diversification; (3) Risk Tolerance; (4) Rate of Return; (5) Stability; (6) Turnover; (7) Liquidity; and (8) Reasonable Costs of Fees." [West Virginia Code §12-6-11(a)(5)]

## PARTICIPANT PLANS

The Board's objective is to manage the Participant Plans' moneys in an efficient and economical manner, managing risk as it seeks to achieve the specific goals set out in each Participant Plan's investment program.

## EQUITY POOL

## **OBJECTIVES**

The main objective for the Equity Pool is to provide for long-term growth for all participants. The Equity Pool is comprised of separate strategic asset classes which, when taken in aggregate, enable adequate diversification. Separate investment pools have been established for each investment style or to comply with specific legal and accounting requirements. The strategic asset classes, the Neutral Target allocations to additional sub-components of the strategic asset classes, as well as the approved Allocation Ranges within which the Allocation Committee can operate, are outlined below:

| Category             | Strategic Allocation | Allocation Range    |
|----------------------|----------------------|---------------------|
| U.S. Equity          | 25.0%                | +/- 5% (20% to 30%) |
| International Equity | 25.0%                | +/- 5% (20% to 30%) |
| Equity Pool          | 50.0%                | +/- 5% (45% to 55%) |

Note: Each Participant Plan has its own unique Strategic Allocation. The above example is for clarification purposes only.

| Category   | Neutral Target*   | Allocation Range                                 |
|--|---|--|
| U.S. Large Cap vs.   | Large = 1 minus Non-Large   | 0.5 to 2.5 times benchmark                       |
| U.S. Non-Large Cap   | Non-Large = Russell 2500/Russell 3000                                 | Sum must equal 100                               |
| U.S. Non-Large Value vs.<br>U.S. Non-Large Growth                      | Value vs. Growth<br>Percentage in Russell 2500                        | 0.5 to 2.5 times benchmark<br>Sum must equal 100 |
| International Large vs.<br>International Small vs.<br>Emerging Markets | Large vs. Small vs. Emerging<br>Percentage in MSCI ACWI ex U.S. (IMI) | 0.5 to 2.5 times benchmark<br>Sum must equal 100 |

\* The Neutral Target is established based on the listed indices and is reset, subject to Allocation Committee decisions, based on these index weights every June 30.

## EQUITY POOL (Continued)

## MANAGEMENT STRUCTURE

The equity pools are managed by the following firms, in accordance with a particular investment style.

| Manager  | Style   |
|--|---|
| Large Cap Domestic Equity Pool                               |   |
| State Street Global Advisors                                 | Index Core                                    |
| INTECH Investment Management, LLC                            | Quantitative Core                             |
| Non-Large Cap Domestic Equity Pool                           |   |
| Westfield Capital Management                                 | Growth at a Reasonable Price                  |
| AJO  | Relative Value                                |
| International Qualified and International Nonqualified Pools |   |
| Developed Markets  |   |
| Silchester International Investors                           | All Country, Value                            |
| International Equity Pool                                    |   |
| Developed Markets  |   |
| LSV Asset Management   | All Country, Relative Value                   |
| Small Capitalization   |   |
| Oberweis Asset Management, Inc.                              | All Country, Growth                           |
| Acadian Asset Management, LLC                                | All Country, Quantitative Value               |
| Emerging Markets   |   |
| Brandes Investment Partners, L.P.                            | Emerging Market, Value                        |
| Axiom International Investors, LLC                           | Emerging Market, Growth at a Reasonable Price |

## FINANCIAL HIGHLIGHTS (in \$000s)

Audited financial statements are prepared for each of the equity pools and are available at WVIMB.org. Financial Highlights for each pool are presented below.

| Composite          | Individual Pools per Audited Financial Statements |
|--------------------|---|
| U.S. Large Cap     | Large Cap Domestic Equity Pool                    |
| U.S. Non-Large Cap | Non-Large Cap Domestic Equity Pool                |
| International      | International Qualified Pool                      |
|                    | International Nonqualified Pool                   |
|                    | International Equity Pool                         |

| Condensed Statement of Assets and Liabilities | Large Cap<br>Domestic Equity | Non-Large Cap<br>Domestic Equity |
|---|------------------------------|----------------------------------|
| Investments                                   | \$ 3,712,069                 | \$ 943,382                       |
| Payable upon return of securities loaned      | (186,571)                    | (212,486)                        |

## **INVESTMENT PERFORMANCE (in \$000s)**

The IMB calculates total rates of return using the time-weighted rate of return methodology based on market rate of return. The time-weighted method determines the rate of return exclusive of the effects of participant contributions or withdrawals. Actual rates of return are net of investment advisor fees.

## A complete listing of the investments in each pool is available at www.wvimb.org.

## **EXPENSES**

The IMB charges each investment pool for its direct investment-related expenses, such as investment advisor fees, custodian bank fees, and some professional service fees, and an allocated share of other expenses. The Equity Pool's expenses for the year, divided by the average net position, are as follows:

| Expense Ratios (in basis points) | Large Cap<br>Domestic<br>Equity | Non-Large Cap<br>Domestic Equity | International<br>Qualified | International<br>Nonqualified | International<br>Equity |
|----------------------------------|---------------------------------|----------------------------------|----------------------------|-------------------------------|-------------------------|

# SHORT-TERM FIXED INCOME POOL

#### **OBJECTIVES**

The Short-Term Fixed Income Pool was created to maintain sufficient liquidity to meet the daily disbursements requested by the Plans and to invest any contributions until the time the money is transferred to other asset classes without sustaining capital losses and while earning a small return above inflation. The Short-Term Fixed Income Pool is structured as a commingled fund where the goal is a stable dollar value per share, thus preserving principal. The risk factor on this pool is low and managed through numerous maturity restrictions, diversification guidelines, and credit limits. The participants are paid on an income basis that includes interest income net of expenses.

#### MANAGEMENT STRUCTURE

The Short-Term Fixed Income Pool is managed by JPMorgan Investment Advisors, Inc.

#### FINANCIAL HIGHLIGHTS (in \$000s)

Audited financial statements for the Short-Term Fixed Income Pool are available at WVIMB.org. Financial Highlights are presented below.

#### SHORT-TERM FIXED INCOME POOL (Continued)

# INVESTMENT PERFORMANCE

The IMB calculates total rates of return using the time-weighted rate of return methodology based on market rate of return. The time-weighted method determines the rate of return exclusive of the effects of participant contributions or withdrawals. Actual rates of return are net of investment advisor fees.

| Period     | Actual | Citigroup 90 Day Treasury Bill* |
|------------|--------|---------------------------------|
| One-year   | 0.5%   | 0.5%                            |
| Three-year | 0.3%   | 0.2%                            |
| Five-year  | 0.2%   | 0.2%                            |
| Ten-year   | 0.7%   | 0.6%                            |

\*Prior to January 2014, the Short-Term Fixed Income Pool index was the Citigroup 90 Day Treasury Bill plus 15 basis points.

# FIXED INCOME POOL

#### **OBJECTIVES**

The main objectives for the Fixed Income Pool are to generate investment income, provide stability, and enhance diversification, but not at the expense of total return. Separate investment pools have been established for particular investment styles or to comply with specific accounting requirements. The strategic asset class, the Neutral Target allocation to the sub-component of the strategic asset class, as well as the approved Allocation Ranges within which the Allocation Committee can operate, are outlined below:

| Category                  | Strategic Allocation | Allocation Range    |
|---------------------------|----------------------|---------------------|
| Core Fixed Income         |                      |                     |
| Total Return Fixed Income |                      |                     |
| Fixed Income Pool         | 20.0%                | +/- 5% (15% to 25%) |

Note: Each Participant Plan has its own unique Strategic Allocation. The above example is for clarification purposes only.

| Neutral Target                | Allocation Range     |  |  |  |
|-------------------------------|----------------------|--|--|--|
| 50% Total Return Fixed Income | +/- 20% (30% to 70%) |  |  |  |
| 50% Core Fixed Income         | +/- 20% (30% to 70%) |  |  |  |

#### MANAGEMENT STRUCTURE

The fixed income pools are managed by the following firms, in accordance with a particular investment style.

| Manager                            | Style                         |
|------------------------------------|-------------------------------|
| Total Return Fixed Income Pool     |                               |
| Western Asset Management Company   | Core Plus Fixed Income        |
| Dodge & Cox                        | Core Plus Fixed Income        |
| Franklin Templeton Investments     | Emerging Markets Fixed Income |
| Core Fixed Income Pool             |                               |
| JPMorgan Investment Advisors, Inc. | Core Fixed Income             |

#### FINANCIAL HIGHLIGHTS (in \$000s)

Audited financial statements are prepared for each of the fixed income pools and are available at WVIMB.org. Financial Highlights for each pool are presented below.

#### INVESTMENT PERFORMANCE

The IMB calculates total rates of return using the time-weighted rate of return methodology based on market rate of return. The time-weighted method determines the rate of return exclusive of the effects of participant contributions or withdrawals. Actual rates of return are net of investment advisor fees.

# SPECIAL PURPOSE POOL

#### **OBJECTIVES**

The Board operates one special purpose pool: TRS ANNUITY POOL

#### HISTORY (in \$000s)

The Pool held an investment contract issued by the Variable Annuity Life Insurance Company (VALIC) strictly for the benefit of the Teachers' Retirement System (TRS). On December 10, 2008, the IMB assumed responsibility for this investment as part of the restructuring of the Teachers' Defined Contribution (TDC) plan, a separate retirement plan administered solely by the Consolidated Public Retirement System, whereby certain TDC participants elected to transfer the ownership of their individual TDC retirement accounts to the TRS in exchange for current participation in the TRS defined benefit plan. The final amount transferred under the contract was \$248,293.

The IMB initially requested the immediate redemption of the entire balance but VALIC denied the request, claiming the amounts were subject to withdrawal restrictions. Effective April 23, 2009, the IMB, while reserving its rights under the contract, executed the appropriate forms with VALIC to elect to withdraw funds under the Five Year Equal Annual Installment method. By making this election the guaranteed minimum annual yield of 4.5 percent became the fixed rate for this contract. The first four withdrawals of \$55,058 each occurred on May 4, 2009, 2010, 2011 and 2012. The final withdrawal of \$55,191 occurred on May 8, 2013. On that date, all remaining income, net of all management fees, was distributed to TRS and all units of ownership in the Pool were redeemed.

In response to VALIC's denial to allow the IMB to liquidate the contract in its entirety, the IMB sued VALIC. A three-judge arbitration panel issued it decision on April 28, 2017, and no recovery was awarded to the IMB. A notice of appeal has been filed with the West Virginia Supreme Court of Appeals. There are ongoing legal fees associated with this litigation and these expenses are accrued to the Pool. The funding for the payment of these expenses results from contributions by the TRS into the TRS Annuity Pool. No other management fees are charged to the Pool and none have been charged since the final withdrawal on May 8, 2013. Once this matter is finalized the TRS Annuity Pool will be closed.

#### FINANCIAL HIGHLIGHTS (in \$000s)

# PRIVATE EQUITY POOL

# **OBJECTIVES**

The objectives for the Private Equity Pool are to provide for long-term growth of its participants' assets and risk-reduction through diversification.

The Private Equity Pool is comprised of the following categories and target range allocations as of June 30, 2017:

| Category          | Target Range |  |  |
|-------------------|--------------|--|--|
| Corporate Finance | 90-100%      |  |  |
| Venture Capital   | 0-10%        |  |  |
| U.S.              | 80-100%      |  |  |
| Non-U.S.          | 0-20%        |  |  |

#### MANAGEMENT STRUCTURE

The selection of investments in the Private Equity Pool is made by the Pool's subcommittee which includes the Executive Director/Chief Investment Officer, the Chief Financial Officer/Chief Operating Officer, the Senior Investment Officer, and two members selected from the Board. Investment recommendations are jointly made by the Private and Public Equity Investment Officer and Franklin Park Associates, LLC, the investment consultant to the subcommittee.

#### PRIVATE EQUITY POOL (Continued)

# INVESTMENT PERFORMANCE

The IMB calculates total rates of return using the time-weighted rate of return methodology based on market rate of return. The time-weighted method determines the rate of return exclusive of the effects of participant contributions or withdrawals. Actual rates of return are net of external investment management and/or partnership fees and expenses.

| Period     | Actual | Russell 3000 plus<br>300 basis points* |
|------------|--------|--|
| One-year   | 19.7%  | N/A                                    |
| Three-year | 13.7%  | N/A                                    |
| Five-year  | 13.9%  | 17.9%                                  |

\*Prior to January 2014, the Private Equity Pool index was the S&P 500 plus 500 basis points.

# LARGEST HOLDINGS (in \$000s)

#### A complete listing of the investments in each pool is available at www.wvimb.org.

#### EXPENSES

The IMB charges each investment pool for its direct investment-related expenses, such as investment advisor fees, custodian bank fees, and some professional service fees, and an allocated share of other expenses. The Private Equity Pool's expenses for the year, divided by the average net position, are as follows:

#### Expense Ratio (in basis points)

| Investment advisor fees          | 0.4  |
|----------------------------------|------|
| Trustee fees                     | 0.0* |
| Custodian bank fees              | 0.0* |
| Management fees                  | 2.7  |
| Fiduciary bond fees              | 0.0* |
| External fees/Fund closing costs | 1.5  |
| Professional service fees        | 6.1  |
| Total                            | 10.7 |
|                                  |      |

# **REAL ESTATE POOL**

# **OBJECTIVES**

The objectives for the Real Estate Pool are to reduce risk through diversification and to generate long-term growth of participants' assets.

The Real Estate Pool is comprised of three categories. The target range allocations as of June 30, 2017, are as follows:

| Category      | Target | Target Range         |
|---------------|--------|----------------------|
| Core          | 50%    | +/- 20% (30% to 70%) |
| Value-Added   | 30%    | +/- 20% (10% to 50%) |
| Opportunistic | 20%    | +/- 10% (10% to 30%) |

# MANAGEMENT STRUCTURE

The selection of investments in the Real Estate Pool is made by the Pool's subcommittee which includes the Executive Director/Chief Investment Officer, the Chief Financial Officer/Chief Operating Officer, Private and Public Equity Investment Officer, and two members selected from the Board. Investment recommendations are jointly made by the Fixed Income and Real Estate Investment Officer and Courtland Partners, Ltd, the investment consultant to the subcommittee. The public real estate investments are managed by the following firms, in accordance with a particular investment style.

| Manager                                     | Style                                       |
|---|---|
| CBRE Clarion Securities, LLC                | Global Real Estate Investment Securities    |
| Security Capital Research & Management Inc. | U.S. Debt and Equity Real Estate Securities |

#### **EXPENSES**

The IMB charges each investment pool for its direct investment-related expenses, such as investment advisor fees, custodian bank fees, and some professional service fees, and an allocated share of other expenses. The Opportunistic Income Pool's expenses for the operating period, divided by the average net position, are as follows:

| Expense Ratios (in basis points) |      |
|----------------------------------|------|
| Trustee fees                     | 0.0* |
| Custodian bank fees              | 0.1  |
| Management fees                  | 2.8  |
| Fiduciary bond fees              | 0.0* |
| Professional service fees        | 0.5  |
| Total                            | 3.4  |

# PUBLIC EMPLOYEES' RETIREMENT SYSTEM

#### HISTORY

The Public Employees' Retirement System (PERS) was created in 1961.

# LIQUIDITY NEEDS

PERS is expected to have modest liquidity needs of approximately 1.0 percent to 2.0 percent per year for the foreseeable future.

# **INVESTMENT OBJECTIVES**

The investment objectives are as follows:

- Exceed the actuarial interest rate assumption of 7.5 percent per annum, net of fees.
- Reduce the unfunded liability while maintaining adequate liquidity to satisfy benefit payments and not subjecting PERS to an undue level of risk.

# ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for PERS. Base and Strategic Allocations are established on a market value basis.

| Asset Class                           | Base Allocation | Strategic Allocation** |
|---------------------------------------|-----------------|------------------------|
| Domestic Equity                       | 30.0%           | 27.5%                  |
| International Equity                  | 30.0%           | 27.5%                  |
| Private Equity                        | 0.0%            | 10.0%                  |
| Fixed Income                          | 40.0%           | 15.0%                  |
| Opportunistic Income                  | 0.0%            | 0.0%                   |
| Hedge Fund                            | 0.0%            | 10.0%                  |
| Real Estate                           | 0.0%            | 10.0%                  |
| Cash (included in Fixed Income above) | \$19,000,000*   |                        |

\* IMB Staff has authority to change the cash allocation plus or minus 10 percent, as necessary, in consultation with the appropriate representative(s) from PERS.

\*\* The Base and Strategic Allocations to opportunistic income are 0 percent, but the Allocation Committee has the authority to make a Range Allocation of up to 5 percent to this asset class.

| Five-year  | 9.9%   | 7.5%   |
| Ten-year   | 6.0%   | 7.5%   |

# TEACHERS' RETIREMENT SYSTEM

#### HISTORY

The Teachers' Retirement System (TRS) was created in 1941. It was closed to new members in 1991, but reopened to firsttime hires as of July 1, 2005. Employees hired from 1991 through June 30, 2005, joined the Teachers' Defined Contribution Plan (TDC). In the spring of 2008, more than 78 percent of the participants in the Teachers' Defined Contribution Plan elected to transfer their TDC account balance to TRS and become participants in TRS. This transfer occurred in July 2008.

#### LIQUIDITY NEEDS

TRS has a net negative cash flow position, and will likely continue to have substantial liquidity needs of at least 10 percent per year.

#### **INVESTMENT OBJECTIVES**

The investment objectives are as follows:

- Exceed the actuarial interest rate assumption of 7.5 percent per annum, net of fees.
- Reduce the unfunded liability while maintaining adequate liquidity to satisfy benefit payments and not subjecting TRS to an undue level of risk.

# ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for TRS. Base and Strategic Allocations are established on a market value basis.

| Asset Class                           | Base Allocation | Strategic Allocation** |
|---------------------------------------|-----------------|------------------------|
| Domestic Equity                       | 30.0%           | 27.5%                  |
| International Equity                  | 30.0%           | 27.5%                  |
| Private Equity                        | 0.0%            | 10.0%                  |
| Fixed Income                          | 40.0%           | 15.0%                  |
| Opportunistic Income                  | 0.0%            | 0.0%                   |
| Hedge Fund                            | 0.0%            | 10.0%                  |
| Real Estate                           | 0.0%            | 10.0%                  |
| Cash (included in Fixed Income above) | \$35,000,000*   |                        |

\* IMB Staff has authority to change the cash allocation plus or minus 10 percent, as necessary, in consultation with the appropriate representative(s) from TRS.

\*\* The Base and Strategic Allocations to opportunistic income are 0 percent, but the Allocation Committee has the authority to make a Range Allocation of up to 5 percent to this asset class.

# STATE POLICE DEATH, DISABILITY, AND RETIREMENT FUND

# HISTORY

The State Police Death, Disability and Retirement Fund (SPDDRF) was created in 1925.

# LIQUIDITY NEEDS

SPDDRF is now a closed plan and is expected to experience an increasingly negative cash flow position in the near future.

# **INVESTMENT OBJECTIVES**

The investment objectives are as follows:

- Exceed the actuarial interest rate assumption of 7.5 percent per annum, net of fees.
- Reduce the unfunded liability while maintaining adequate liquidity to satisfy benefit payments and not subjecting SPDDRF to an undue level of risk.

# ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for SPDDRF. Base and Strategic Allocations are established on a market value basis.

| Asset Class                           | Base Allocation | Strategic Allocation** |
|---------------------------------------|-----------------|------------------------|
| Domestic Equity                       | 30.0%           | 27.5%                  |
| International Equity                  | 30.0%           | 27.5%                  |

# **DEPUTY SHERIFFS' RETIREMENT SYSTEM**

# HISTORY

The Deputy Sheriffs' Retirement System (DSRS) was created in 1998.

# LIQUIDITY NEEDS

DSRS currently has positive net cash flows.

# **INVESTMENT OBJECTIVES**

The investment objectives are as follows:

- Exceed the actuarial interest rate assumption of 7.5 percent per annum, net of fees.
- Preserve the current well-funded position while not subjecting DSRS to an undue level of risk.

# ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for DSRS. Base and Strategic Allocations are established on a market value basis.

| Asset Class                           | Base Allocation | Strategic Allocation** |
|---------------------------------------|-----------------|------------------------|
| Domestic Equity                       | 30.0%           | 27.5%                  |
| International Equity                  | 30.0%           | 27.5%                  |
| Private Equity                        | 0.0%            | 10.0%                  |
| Fixed Income                          | 40.0%           | 15.0%                  |
| Opportunistic Income                  | 0.0%            | 0.0%                   |
| Hedge Fund                            | 0.0%            | 10.0%                  |
| Real Estate                           | 0.0%            | 10.0%                  |
| Cash (included in Fixed Income above) | \$250,000*      |                        |

\* IMB Staff has authority to change the cash allocation plus or minus 10 percent, as necessary, in consultation with the appropriate representative(s) from DSRS.

\*\* The Base and Strategic Allocations to opportunistic income are 0 percent, but the Allocation Committee has the authority to make a Range Allocation of up to 5 percent to this asset class.

# EMERGENCY MEDICAL SERVICES RETIREMENT SYSTEM

#### HISTORY

The Emergency Medical Services Retirement System (EMSRS) was created by the *Emergency Medical Services Retirement System Act* effective January 1, 2008, under *West Virginia Code* §16-5V-4. EMSRS members with benefits earned in the Public Employees' Retirement System (PERS) transferred their full membership and benefits under PERS to EMSRS on the effective date.

# LIQUIDITY NEEDS

EMSRS is expected to be in a positive net cash flow position for the foreseeable future.

# **INVESTMENT OBJECTIVES**

The investment objectives are as follows:

- Exceed the actuarial interest rate assumption of 7.5 percent per annum, net of fees.
- Maintain adequate liquidity to satisfy benefit payments while not subjecting EMSRS to an undue level of risk.

# ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for EMSRS. Base and Strategic Allocations are established on a market value basis.

| Asset Class                           | Base Allocation | Strategic Allocation** |

#### MUNICIPAL POLICE OFFICERS AND FIREFIGHTERS RETIREMENT SYSTEM

#### HISTORY

Municipal Police Officers and Firefighters Retirement System (MPFRS) was created in 2010 for the purpose of providing retirement benefits for municipal police officers and paid professional firefighters hired into covered employment by participating municipalities on or after January 1, 2010.

#### LIQUIDITY NEEDS

There are no anticipated liquidity needs at this time.

#### **INVESTMENT OBJECTIVES**

The investment objectives are as follows:

- Exceed the actuarial interest rate assumption of 7.5 percent per annum, net of fees.
- Maintain adequate liquidity to satisfy benefit payments while not subjecting MPFRS to an undue level of risk.

#### ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for MPFRS. Base and Strategic Allocations are established on a market value basis.

| Asset Class          | Policy Allocation | Strategic Allocation |
|----------------------|-------------------|----------------------|
| Domestic Equity      | 30.0%             | 27.5%                |

| Three-year | 6.2%   | 7.5%   |
| Five-year  | 9.4%   | 7.5%   |

# ACTUARIAL SECTION

The Actuarial Section of the comprehensive annual financial report provides information related to the actuarial valuations prepared for each of the pension plans for funding purposes. Other schedules provide information regarding the required contributions, benefits, and funded status of the plans.

Effective with the adoption of GASB 67 for the fiscal year ended June 30, 2014, each of the pension plans has an actuarial valuation prepared for funding purposes and a separate actuarial valuation prepared for financial reporting purposes. The actuarial valuations included in this section of the comprehensive annual financial report have been prepared for funding purposes and have been prepared as of July 1, 2016, the beginning of the plan year. The actuarial valuations prepared for financial reporting purposes have been prepared as of June 30, 2017, the end of the plan year, and were the source of much of the actuarial information in the Financial Section.

The actuarial methods and assumptions used to prepare the actuarial valuations for funding purposes and for financial reporting purposes are nearly identical. The primary difference is in the asset valuation method for the Public Employees Retirement System (PERS). For financial reporting purposes, the fair value of the PERS assets as of the end of the fiscal year is used. For funding purposes, a four year smoothing of the actuarial gain or loss on PERS asset returns each year is used.

West Virginia Public Employees' Retirement System West Virginia Consolidated Public Retirement Board 4101 MacCorkle Avenue, SE Charleston, WV 25304

Dear Board Members,

We performed the annual actuarial valuation of the West Virginia Public Employees' Retirement System (PERS) as of July 1, 2016. The purpose of the actuarial valuation is to determine the actuarial liabilities for the System for funding purposes and to determine if the expected contributions will be sufficient to meet or exceed the System's long term funding policy. The valuation was based on membership data as of June 30, 2016, maintained by the West Virginia Consolidated Public Retirement Board, and unaudited financial information received from the West Virginia Investment Management Board.

The tables presented for PERS in the actuarial section of this Comprehensive Annual Financial Report are based on information contained in our July 1, 2016 valuation report dated March 31, 2017. These tables include:

## **Financial Section**

Schedules of Contributions

## **Actuarial Section**

- · Summary of Actuarial Assumptions and Methods
- Schedule of Active Member Valuation Data
- Solvency Test
- · Schedule of Retirees and Beneficiaries
- Schedule of Funding Progress
- Changes in Unfunded Actuarial Liability

This report presents fairly the actuarial position of the West Virginia Public Employees' Retirement System as of July 1, 2016, in accordance with Actuarial Standards of Practice (ASOPs) applied on a basis consistent with that of the preceding valuation. In my opinion, the assumptions used in preparing the liabilities and costs are individually reasonable with respect to PERS experience and represent my best estimate of anticipated future experience of PERS. The assumptions were developed in accordance with the guidance set forth in applicable Actuarial Standards of Practice, including ASOPs 27 and 35. In particular, the mortality assumptions were developed in accordance with the West Virginia Public Employees' Retirement System January 31, 2018 Page 2

recommendation that an appropriate margin for future improvement in mortality beyond the measurement date be included.

Future actuarial measurements may differ significantly from current measurements due to system experience differing from that anticipated by the economic and demographic assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in system provisions, or applicable law or regulations. An analysis of the potential range of such future differences is beyond the scope of this valuation.

Where presented, references to "funded ratio" and "unfunded accrued liability" typically are measured on an actuarial value of assets basis. It should be noted that the same measurements using market value of assets would result in different funded ratios and unfunded accrued liabilities. Moreover, the funded ratio presented is appropriate for evaluating the need for and level of future contributions but makes no assessment regarding the funded status of the plan if the plan were to settle (i.e., purchase annuities to cover) a portion or all of its liabilities.

The results presented herewith were prepared solely for the Consolidated Public Retirement Board for the purposes herein stated and may not be appropriate to use for other purposes. Conduent does not intend to benefit and assumes no duty or liability to other parties who receive this work. Use of this report for any other purposes or by anyone other than the Consolidated Public Retirement Board and its auditors may not be appropriate and may result in mistaken conclusions because of failure to understand applicable assumptions, methods, or inapplicability of the report for that purpose. The attached pages should not be provided without a copy of this cover letter. No one may make any representations or warranties based on any statements or conclusions contained in this report without Conduent's prior written consent.

I am a Fellow of the Society of Actuaries and a Member of the American Academy of Actuaries. I meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained in this report. This report has been prepared in accordance with all applicable Actuarial Standards of Practice, and I am available to answer questions about it.

## SUMMARY OF ACTUARIAL METHODS AND ASSUMPTIONS

Valuation Date: July 1, 2016

## Funding Method and Basis for Assumptions

The valuation is prepared under the Entry Age Normal Cost Method with individually computed accrued liabilities. The Normal Cost is computed in aggregate. Entry is based on date of hire.

Experience studies are performed at least once in every 5-year period. This valuation was prepared on the basis of assumptions that were recommended to and adopted by the Board based on the experience study covering the period from July 1, 2009, to June 30, 2014. These assumptions will remain in effect for valuation purposes until such time as the Board adopts revised assumptions.

#### Interest Rate and Expenses

The valuation interest assumption is 7.50% per annum, with no loading for system expenses.

#### Salary Scales

Salary scales are used for the assumed increase in salary. Projected salary increases for State and Nonstate employees range from 3.00% to 6.00% per year. Assumed increases in salary for sample ages are as follows:

| Salary S | Scales |
|----------|--------|
|----------|--------|

| Age | State | Nonstate |
|-----|-------|----------|
| 30  | 4.10% | 4.60%    |
| 40  | 3.60% | 4.10%    |
| 50  | 3.10% | 3.85%    |
| 60  | 3.00% | 3.35%    |
|     |       |          |

#### Mortality

The mortality tables are as follows:

| Pre-retirement males:              | 100% of RP-2000 Non-Annuitant table, projected with Scale AA on a fully generational basis        |
|------------------------------------|---|
| Pre-retirement females:            | 100% of RP-2000 Non-Annuitant table, projected with Scale AA on a fully generational basis        |
| • Post-retirement healthy males:   | 110% of RP-2000 Healthy Annuitant table, projected with Scale<br>AA on a fully generational basis |
| • Post-retirement healthy females: | 101% of RP-2000 Healthy Annuitant table, projected with Scale AA on a fully generational basis    |
| Disabled males:                    | 96% of RP-2000 Disabled Annuitant table, projected with Scale AA on a fully generational basis    |
| Disabled females:                  | 107% of RP-2000 Disabled Annuitant table, projected with Scale AA on a fully generational basis   |

#### ACTUARIAL SECTION Public Employees' Retirement System

#### Withdrawal from Service

Specific tables have been created to reflect withdrawal rates. All withdrawals are assumed to result in refund of contributions if non-vested or a deferred annuity if vested. The liability for a refund of contributions for nonactive non-vested members as of the valuation date is assumed to be 60% of the total employee contribution balance of such members. Sample withdrawal rates are as follows:

#### Withdrawal Rates

| State (less than 1 year) |         |         |
|--------------------------|---------|---------|
| Age                      | Male    | Female  |

| 69                 | 0.20  |  |  |  |
| 70+                | 1.00  |  |  |  |

## **Family Composition**

It is assumed that 85% of males and 80% of females are married, with husbands 3 years older than wives. Remarriage rates are not used.

## Accrual of Future Service

It is assumed that active members will accrue 1 year of service for each future year of employment.

## **Noncontributory Service Loadings**

Noncontributory service for active members is estimated from member's contributory service by adjusting the present value of benefits projected from contributory service alone. The assumed service leads are as follows:

|   |                   | Tier 1  | <u>Tier 2</u> |
|---|-------------------|---------|---------------|
| • | Male - State      | 10.400% | 7.000%        |
| • | Male - Nonstate   | 10.000% | 7.500%        |
| • | Female - State    | 2.800%  | 0.300%        |
| ٠ | Female - Nonstate | 2.475%  | 0.275%        |

## **Asset Valuation Method**

4-year 25% level smoothing of actuarial gain or (loss) on trust fund return:

- Implemented over 4 years, prospectively commencing July 1, 2009 for the experience for the trust year ending June 30, 2009.
- Actuarial gain or (loss) on assets is calculated as the difference between the expected return under valuation assumptions based on the smoothed Actuarial Value of Assets and the actual trust fund return.
- Actuarial gain or (loss) is recognized at 25% of the original amount each year until fully recognized in the fourth year.
- Total accumulated deferred gain or (loss) amounts are used to adjust the reported Market Value of Assets to determine the Actuarial Value of Assets.

## **System Contributions**

Both employee and employer contributions to the System are assumed to be paid in the middle of the year.

## **Schedule of Contributions**

The Schedule of Contributions is included in the Required Supplementary Information provided in the Financial Section of this Comprehensive Annual Financial Report.

#### **Plan Provisions**

A discussion of plan provisions is included in Note 2 to the financial statements included in the Financial Section.

260 Franklin Street Suite 500 Boston, MA 02110

January 31, 2018

West Virginia Teachers' Retirement System West Virginia Consolidated Public Retirement Board 4101 MacCorkle Avenue, SE Charleston, WV 25304

Dear Board Members:

We performed the annual actuarial valuation of the West Virginia Teachers' Retirement System (TRS) as of July 1, 2016. The purpose of the actuarial valuation is to determine the actuarial liabilities for the System for funding purposes and to determine if the expected contributions will be sufficient to meet or exceed the System's long term funding policy.

The valuation was based on membership data as of June 30, 2016, maintained by the West Virginia Consolidated Public Retirement Board, and unaudited financial information received from the West Virginia Investment Management Board.

The tables presented for TRS in the actuarial section of this Comprehensive Annual Financial Report are based on information contained in our July 1, 2016 valuation report dated March 31, 2017. These tables include:

- Solvency Test
- Schedule of Retirees and Beneficiaries
- Schedule of Funding Progress
- · Changes in Unfunded Actuarial Liability

This report presents fairly the actuarial position of the West Virginia Teachers' Retirement System as of July 1, 2016, in accordance with Actuarial Standards of Practice(ASOPs) applied on a basis consistent with that of the preceding valuation. In my opinion, the assumptions used in preparing the liabilities and costs are individually reasonable with respect to TRS experience and represent my best estimate of anticipated future experience of TRS. The assumptions were developed in accordance with the guidance set forth in applicable Actuarial Standards of Practice, including ASOPs 27 and 35.

West Virginia Teachers' Retirement System January 31, 2018 Page 2

In particular, the mortality assumptions were developed in accordance with the recommendation that an appropriate margin for future improvement in mortality beyond the measurement date be included.

Future actuarial measurements may differ significantly from current measurements due to system experience differing from that anticipated by the economic and demographic assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in system provisions, or applicable law or regulations. An analysis of the potential range of such future differences is beyond the scope of this valuation.

Where presented, references to "funded ratio" and "unfunded accrued liability" typically are measured on a market value of assets basis. The funded ratio presented is appropriate for evaluating the need and level of future contributions, but makes no assessment regarding the funded status of the plan if the plan were to settle (i.e., purchase annuities to cover) a portion or all of its liabilities.

The results presented herewith were prepared solely for the Consolidated Public Retirement Board for the purposes herein stated and may not be appropriate to use for other purposes. Conduent does not intend to benefit and assumes no duty or liability to other parties who receive this work. Use of this report for any other purposes or by anyone other than the Consolidated Public Retirement Board and its auditors may not be appropriate and may result in mistaken conclusions because of failure to understand applicable assumptions, methods, or inapplicability of the report for that purpose. The attached pages should not be provided without a copy of this cover letter. No one may make any representations or warranties based on any statements or conclusions contained in this report without Conduent's prior written consent.

I am a Fellow of the Society of Actuaries and a Member of the American Academy of Actuaries. I meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained in this report. This report has been prepared in accordance with all applicable Actuarial Standards of Practice, and I am available to answer questions about it.

# ACTUARIAL SECTION

Teachers' Retirement System

## SUMMARY OF ACTUARIAL METHODS AND ASSUMPTIONS

Valuation Date: July 1, 2016

## **Funding Method and Basis for Assumptions**

The valuation is prepared under the Entry Age Cost Method with individually computed accrued liabilities. The Normal Cost is computed in aggregate. Entry is based on adjusted date of hire (i.e. valuation date minus known past service).

Experience studies are performed at least once in every five-year period. This valuation was prepared on the basis of assumptions that were recommended to and adopted by the Board based on the experience study covering the period from July 1, 2010, to June 30, 2015. These assumptions will remain in effect for valuation purposes until such time as the Board adopts revised assumptions.

## Interest Rate and Expenses

The valuation interest assumption is 7.5% per annum, with no loading for plan expenses.

#### **Salary Scales**

Projected salary increases are in the following ranges by group, with an underlying inflation rate of 3.0%:

|              | Range of Projected |
|--------------|--------------------|
| Group        | Salary Increases   |
| Teachers     | 3.00% - 6.00%      |
| Non-Teachers | 3.00% - 6.50%      |

A sample of salaries from the salary scales is as follows:

#### **Salary Scales**

|   |    |          | Non-Teachers |
|---|----|----------|--------------|
| A | ge | Teachers | and State    |
|   | 30 | 5.571%   | 5.579%       |
|   | 40 | 4.714%   | 4.842%       |
|   | 50 | 3.857%   | 4.105%       |
|   | 60 | 3.353%   | 3.368%       |

#### **Pre-Retirement Mortality**

RP-2000 Non-Annuitant table, projected with Scale AA on a fully generational basis.

#### **Post-Retirement Mortality**

The mortality tables used are as follows:

- Healthy males 97% of RP-2000 Healthy Annuitant table, projected with Scale AA on a fully generational basis
- Healthy females 94% of RP-2000 Healthy Annuitant table, projected with Scale AA on a fully generational basis
- Disabled males 96% of RP-2000 Disabled Annuitant table, projected with Scale AA on a fully generational basis
- Disabled females 101% of RP-2000 Disabled Annuitant table, projected with Scale AA on a fully generational basis

## Withdrawal from Service

Withdrawal rates are assumed to cease upon eligibility for retirement. All withdrawal is assumed to result in refund of contributions if non-vested or a deferred annuity if vested. Sample withdrawal rates are as follows:

#### Withdrawal Rates

| Teachers (less than 1 year) |         |         |  |
|-----------------------------|---------|---------|--|
| Age                         | Male    | Female  |  |
| 30                          | 0.19571 | 0.19571 |  |
| 40                          | 0.25286 | 0.25286 |  |
| 50                          | 0.31000 | 0.31000 |  |
| 60                          | 0.35000 | 0.35000 |  |

#### Withdrawal Rates

| Teachers (2 to 3 years) |         |         |  |
|-------------------------|---------|---------|--|
| Age                     | Male    | Female  |  |
| 30                      | 0.06850 | 0.07400 |  |
| 40                      | 0.06500 | 0.05400 |  |
| 50                      | 0.06500 | 0.05000 |  |
| 60                      | 0.06500 | 0.05000 |  |

#### Withdrawal Rates

| Teachers (4 to 5 years) |         |         |  |
|-------------------------|---------|---------|--|
| Age                     | Male    | Female  |  |
| 30                      | 0.04930 | 0.05400 |  |
| 40                      | 0.04030 | 0.03401 |  |
| 50                      | 0.03130 | 0.02250 |  |
| 60                      | 0.02500 | 0.02250 |  |

#### Withdrawal Rates

| Non-Teachers and State (less than 1 year) |         |         |  |
|---|---------|---------|--|
| Age                                       | Male    | Female  |  |
| 30  | 0.15600 | 0.21450 |  |
| 40  | 0.13200 | 0.18150 |  |
| 50  | 0.10800 | 0.14850 |  |
| 60  | 0.08400 | 0.11550 |  |

## Withdrawal Rates

| Non-Teac | Non-Teachers and State (2 to 3 years) |         |  |
|----------|---------------------------------------|---------|--|
| Age      | Male                                  | Female  |  |
| 30       | 0.09440                               | 0.09520 |  |
| 40       | 0.06240                               | 0.06160 |  |
| 50       | 0.04000                               | 0.04480 |  |
| 60       | 0.04000                               | 0.04480 |  |

#### Withdrawal Rates

| Teachers (1 to 2 years) |         |         |  |
|-------------------------|---------|---------|--|
| Age                     | Male    | Female  |  |
| 30                      | 0.12978 | 0.10314 |  |
| 40                      | 0.11875 | 0.09457 |  |
| 50                      | 0.10772 | 0.08600 |  |
| 60                      | 0.10000 | 0.08000 |  |

#### Withdrawal Rates

| Teachers (3 to 4 years) |         |         |  |
|-------------------------|---------|---------|--|
| Age                     | Male    | Female  |  |

| 61  | 0.250 | 0.200    | 0.150 | 0.175     |
| 62  | 0.350 | 0.275    | 0.350 | 0.250     |
| 63  | 0.250 | 0.250    | 0.250 | 0.200     |
| 64  | 0.250 | 0.250    | 0.175 | 0.200     |
| 65  | 0.400 | 0.300    | 0.300 | 0.300     |
| 66  | 0.300 | 0.350    | 0.225 | 0.250     |
| 67  | 0.250 | 0.300    | 0.225 | 0.225     |
| 68  | 0.250 | 0.300    | 0.225 | 0.225     |
| 69  | 0.250 | 0.300    | 0.225 | 0.225     |
| 70+ | 1.000 | 1.000    | 1.000 | 1.000     |

## **Accrual of Future Service**

It is assumed that all active members will accrue 1 year of service for each future year of employment.

## **Non-Contributory Service Loadings**

The load factor assumptions for non-contributory service (military, parochial or out-of-state teaching, transferred PERS service, and unused sick leave) are as follows:

|              | Ma     | e      | Fem    | ale    |
|--------------|--------|--------|--------|--------|
| Group        | Tier 1 | Tier 2 | Tier 1 | Tier 2 |
| Teachers     | 7.75%  | 0.50%  | 4.50%  | 0.00%  |
| Non-Teachers | 4.50%  | 0.50%  | 3.25%  | 0.00%  |

## **Family Composition**

It is assumed that 85% of males and 80% of females are married, with husbands 3 years older than wives. Remarriage rates are not used.

## Asset Valuation Method

4 year 25% level smoothing of actuarial gain or (loss) on trust fund return:

- Implemented over 4 years, prospectively commencing July 1, 2016 for the experience for the trust year ending June 30, 2016.
- Actuarial gain or (loss) on assets is calculated as the difference between the expected return under valuation assumptions based on the smoothed Actuarial Value of Assets and the actual trust fund return.
- Actuarial gain or (loss) is recognized at 25% of the original amount each year until fully recognized in the fourth year.
- Total accumulated deferred gain or (loss) amounts are used to adjust the reported Market Value of Assets to determine the Actuarial Value of Assets.

## Plan Contribution

Both employee and employer contributions to the plan are assumed to be paid in the middle of the year.

## **Schedule of Contributions**

The Schedule of Contributions is included in the Required Supplementary Information provided in the Financial Section of this Comprehensive Annual Financial Report.

#### **Plan Provisions**

A discussion of plan provisions is included in Note 2 to the financial statements included in the Financial Section.

260 Franklin Street Suite 500 Boston, MA 02110

January 31, 2018

West Virginia Department of Public Safety Death, Disability and Retirement Fund West Virginia Consolidated Public Retirement Board 4101 MacCorkle Avenue, SE Charleston, WV 25304

Dear Board Members:

We performed the annual actuarial valuation of the West Virginia Department of Public Safety Death, Disability and Retirement Fund (Plan A) as of July 1, 2016. The purpose of the actuarial valuation is to determine the actuarial liabilities for the System for funding purposes and to determine if the expected contributions will be sufficient to meet or exceed the System's long term funding policy.

The valuation was based on membership data as of June 30, 2016, maintained by the West Virginia Consolidated Public Retirement Board, and unaudited financial information received from the West Virginia Investment Management Board.

The tables presented for Plan A in the actuarial section of this Comprehensive Annual Financial Report are based on information contained in our July 1, 2016 valuation report dated March 31, 2017. These tables include:

## **Actuarial Section**

- · Summary of Actuarial Assumptions and Methods
- Schedule of Active Member Valuation Data
- Solvency Test
- Schedule of Retirees and Beneficiaries
- Schedule of Funding Progress
- Changes in Unfunded Actuarial Liability

This report presents fairly the actuarial position of Plan A as of July 1, 2016, in accordance with Actuarial Standards of Practice (ASOPs) applied on a basis consistent with that of the preceding valuation. In my opinion, the assumptions used in preparing the liabilities and costs are individually reasonable with respect to Plan A experience and represent my best estimate of anticipated future experience of Plan A. The assumptions were developed in accordance with the guidance set forth in applicable Actuarial Standards of Practice, including ASOPs 27 and 35. In particular, the mortality

West Virginia Department of Public Safety Death, Disability and Retirement Fund January 31, 2018 Page 2

assumptions were developed in accordance with the recommendation that an appropriate margin for future improvement in mortality beyond the measurement date be included.

Future actuarial measurements may differ significantly from current measurements due to system experience differing from that anticipated by the economic and demographic assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in system provisions, or applicable law or regulations. An analysis of the potential range of such future differences is beyond the scope of this valuation.

Where presented, references to "funded ratio" and "unfunded accrued liability" typically are measured on a market value of assets basis. The funded ratio presented is appropriate for evaluating the need and level of future contributions, but makes no assessment regarding the funded status of the plan if the plan were to settle (i.e., purchase annuities to cover) a portion or all of its liabilities.

The results presented herewith were prepared solely for the Consolidated Public Retirement Board for the purposes herein stated and may not be appropriate to use for other purposes. Conduent does not intend to benefit and assumes no duty or liability to other parties who receive this work. Use of this report for any other purposes or by anyone other than the Consolidated Public Retirement Board and its auditors may not be appropriate and may result in mistaken conclusions because of failure to understand applicable assumptions, methods, or inapplicability of the report for that purpose. The attached pages should not be provided without a copy of this cover letter. No one may make any representations or warranties based on any statements or conclusions contained in this report without Conduent's prior written consent.

I am a Fellow of the Society of Actuaries and a Member of the American Academy of Actuaries. I meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained in this report. This report has been prepared in accordance with all applicable Actuarial Standards of Practice, and I am available to answer questions about it.

## SUMMARY OF ACTUARIAL METHODS AND ASSUMPTIONS

## Valuation Date: July 1, 2016

## **Funding Method and Basis for Assumptions**

The valuation is prepared under the Entry Age Cost Method with individually computed accrued liabilities. The Normal Cost is computed in aggregate. Entry is based on date of hire.

Experience studies are performed at least once in every five-year period. This valuation was prepared on the basis of assumptions that were recommended to and adopted by the Board based on the experience study covering the period from July 1, 2006, to June 30, 2011. These assumptions will remain in effect for valuation purposes until such time as the Board adopts revised assumptions.

#### **Interest Rate and Expenses**

The valuation interest assumption is 7.50% per annum, with no loading for plan expenses.

## **Pre-Retirement Mortality**

The male and female RP-2000 Non-Annuitant Mortality Tables, projected to 2020 with Scale BB. It is assumed that 70% of deaths of members in service are duty-related.

## **Post-Retirement Mortality**

Post-retirement mortality tables are as follows:

Healthy: RP-2000 Healthy Annuitants, projected to 2025 with Scale BB

Disabled: RP-2000 Healthy Annuitants, projected to 2025 with Scale BB, set forward 1 year

#### Salary Scales

Compensation is assumed to increase 5.00% per year for the first 2 years of service, 4.50% for the next 3 years, 4.00% for the next 5 years, and 3.25% per year thereafter. The inflation rate is 3.00%.

#### Withdrawal from Service

Withdrawal rates cease once an employee is eligible for normal retirement. A sample of withdrawal rates follows:

|     | Rate of    |
|-----|------------|
| Age | Withdrawal |
| 20  | 0.0267     |
| 30  | 0.0190     |
| 40  | 0.0114     |
| 50  | 0.0038     |

## **Disablement Rates**

A sample of disablement rates, which cease once an employee is eligible for normal retirement, are as follows:

|     | Rate of     | Type of              |             |
|-----|-------------|----------------------|-------------|
| Age | Disablement | Disability           | Probability |
| 20  | 0.0005      | Duty-Related Full    | 0.25        |
| 30  | 0.0020      | Duty-Related Partial | 0.60        |
| 40  | 0.0060      | Nonduty-Related      | 0.15        |
| 50  | 0.0040      | ,                    |             |

## Family Composition

It is assumed that 90% of all members are married, with husbands 3 years older than their wives. Remarriage rates are not used.

## Accrual of Future Service

Active members are assumed to accrue 1 year of service for each future year of employment.

## Non-Contributory Service

A 14.5% load is applied to the retirement liability for active members to represent additional benefit service credit at retirement as a result of the conversion of annual leave, sick leave, and additional credit for military service.

## **Retirement Rates**

70% of members are assumed to retire when first eligible for unreduced benefits at the earlier of age 50 and 20 years of service or any age and 25 years of service. An active member who has already attained eligibility for normal retirement has a 20% probability of retiring each year thereafter with 100% retiring on or after attainment of age 55.

## **Asset Valuation Method**

Assets for valuation purposes are included at Market Value.

## **Plan Contributions**

Both employee and employer contributions are assumed to be paid in the middle of the year.

## Schedule of Active Member Valuation Data

## **Schedule of Contributions**

The Schedule of Contributions is included in the Required Supplementary Information provided in the Financial Section of this Comprehensive Annual Financial Report.

## **Plan Provisions**

A discussion of plan provisions is included in Note 2 to the financial statements included in the Financial Section.

260 Franklin Street Suite 500 Boston, MA 02110

January 31, 2018

West Virginia State Police Retirement System West Virginia Consolidated Public Retirement Board 4101 MacCorkle Avenue, SE Charleston, WV 25304

Dear Board Members:

We performed the annual actuarial valuation of the West Virginia State Police Retirement System (Plan B) as of July 1, 2016. The purpose of the actuarial valuation is to determine the actuarial liabilities for the System for funding purposes and to determine if the expected contributions will be sufficient to meet or exceed the System's long term funding policy.

The valuation was based on membership data as of June 30, 2016, maintained by the West Virginia Consolidated Public Retirement Board, and unaudited financial information received from the West Virginia Investment Management Board.

The tables presented for Plan B in the actuarial section of this Comprehensive Annual Financial Report are based on information contained in our July 1, 2016 valuation report dated March 31, 2017. These tables include:

#### **Financial Section**

Schedules of Contributions

#### **Actuarial Section**

- · Summary of Actuarial Assumptions and Methods
- Schedule of Active Member Valuation Data
- Solvency Test
- Schedule of Retirees and Beneficiaries
- Schedule of Funding Progress
- · Changes in Unfunded Actuarial Liability

This report presents fairly the actuarial position of Plan B as of July 1, 2016, in accordance with Actuarial Standards of Practice (ASOPs) applied on a basis consistent with that of the preceding valuation. In my opinion, the assumptions used in preparing the liabilities and costs are individually reasonable with respect to Plan B experience and represent my best estimate of anticipated future experience of Plan B. The assumptions were developed in accordance with the guidance set forth in applicable Actuarial Standards of Practice, including ASOPs 27 and 35. In particular, the mortality

West Virginia State Police Retirement System January 31, 2018 Page 2

assumptions were developed in accordance with the recommendation that an appropriate margin for future improvement in mortality beyond the measurement date be included.

Future actuarial measurements may differ significantly from current measurements due to system experience differing from that anticipated by the economic and demographic assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in system provisions, or applicable law or regulations. An analysis of the potential range of such future differences is beyond the scope of this valuation.

Where presented, references to "funded ratio" and "unfunded accrued liability" typically are measured on a market value of assets basis. The funded ratio presented is appropriate for evaluating the need and level of future contributions, but makes no assessment regarding the funded status of the plan if the plan were to settle (i.e., purchase annuities to cover) a portion or all of its liabilities.

The results presented herewith were prepared solely for the Consolidated Public Retirement Board for the purposes herein stated and may not be appropriate to use for other purposes. Conduent does not intend to benefit and assumes no duty or liability to other parties who receive this work. Use of this report for any other purposes or by anyone other than the Consolidated Public Retirement Board and its auditors may not be appropriate and may result in mistaken conclusions because of failure to understand applicable assumptions, methods, or inapplicability of the report for that purpose. The attached pages should not be provided without a copy of this cover letter. No one may make any representations or warranties based on any statements or conclusions contained in this report without Conduent's prior written consent.

I am a Fellow of the Society of Actuaries and a Member of the American Academy of Actuaries. I meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained in this report. This report has been prepared in accordance with all applicable Actuarial Standards of Practice, and I am available to answer questions about it.

## SUMMARY OF ACTUARIAL METHODS AND ASSUMPTIONS

Valuation Date: July 1, 2016

## **Funding Method and Basis for Assumptions**

The valuation is prepared under the Entry Age Normal Cost Method with individually computed accrued liabilities. The Normal Cost is computed in aggregate. Entry age is based on date of hire.

Experience studies are performed at least once in every five-year period. This valuation was prepared on the basis of assumptions that were recommended to and adopted by the Board based on an experience study covering the period from July 1, 2006, to June 30, 2011. These assumptions will remain in effect for valuation purposes until such time as the Board adopts revised assumptions.

#### Interest Rate and Expenses

The valuation interest assumption is 7.50% per annum, with no loading for plan expenses.

#### **Pre-Retirement Mortality**

The male and female RP-2000 Non-Annuitant tables, projected to 2020 with Scale BB. It is assumed that 70% of deaths of members in service are duty-related.

#### Post-Retirement Mortality

Post-retirement mortality tables are as follows:

Healthy: RP-2000 Healthy Annuitant tables, projected to 2025 with Scale BB

Disabled: RP-2000 Healthy Annuitant tables, projected to 2025 with Scale BB, set forward 1 year

#### Salary Scales

Compensation is assumed to increase 5.00% per year for the first 2 years of service, 4.50% for the next 3 years, 4.00% for the next 5 years, and 3.25% per year thereafter. The inflation rate is 3.00%.

#### Withdrawal from Service

Withdrawal rates cease once an employee is eligible for normal retirement. A sample of withdrawal rates follows:

| Age | Rate of<br>Withdrawal |
|-----|-----------------------|
| 20  | 0.0760                |
| 30  | 0.0542                |
| 40  | 0.0240                |
| 50  | 0.0114                |

## **Disablement Rates**

No disablements are assumed to occur after the later of age 55 and the age first eligible for retirement. A sample of disablement rates follows:

|     | Rate of     | Type of              |             |
|-----|-------------|----------------------|-------------|
| Age | Disablement | Disability           | Probability |
| 20  | 0.0005      | Duty-Related Full    | 0.25        |
| 30  | 0.0020      | Duty-Related Partial | 0.60        |
| 40  | 0.0060      | ,                    |             |
| 50  | 0.0040      | Nonduty-Related      | 0.15        |

## Family Composition

It is assumed that 90% of members are married, with husbands 3 years older than their wives. Re- marriage rates are not used.

## **Accrual of Future Service**

It is assumed that active members will accrue one year of service for each future year of employment.

## Non-Contributory Service

It is assumed that state troopers at retirement will have a 14.5% increase over contributory service added for all sources.

## **Retirement Rates**

70% of members are assumed to retire when first eligible for unreduced benefits at the earlier of age 50 and 25 years of service or age 52 and 20 years of service. An active member who has already attained eligibility for normal retirement has a 20% probability of retiring each year thereafter with 100% retiring on or after attainment of age 55.

## Asset Valuation Method

Assets for valuation purposes are included at Market Value.

## **Plan Contributions**

Plan Contributions, both employee and employer, are assumed to be paid in the middle of the year.

## Schedule of Active Member Valuation Data

| Valuation Date | Number | Annual Payroll | Annual Average Pay | % Increase<br>in Average Pay | Number of<br>Employers |

## **Schedule of Contributions**

The Schedule of Contributions is included in the Required Supplementary Information provided in the Financial Section of this Comprehensive Annual Financial Report.

## **Plan Provisions**

A discussion of plan provisions is included in Note 2 to the financial statements included in the Financial Section.

260 Franklin Street Suite 500 Boston, MA 02110

January 31, 2018

West Virginia Deputy Sheriffs' Retirement System West Virginia Consolidated Public Retirement Board 4101 MacCorkle Avenue, SE Charleston, WV 25304

Dear Board Members:

An annual actuarial valuation of Deputy Sheriffs' Retirement System (DSRS) was prepared as of July 1, 2016. The purpose of the actuarial valuation is to determine the actuarial liabilities for the System for funding purposes and to determine if the expected contributions will be sufficient to meet or exceed the System's long term funding policy. Results of this valuation were provided to us by the West Virginia Consolidated Public Retirement Board and developed under the supervision of Harry W. Mandel, a member of the American Academy of Actuaries who served as Board Actuary. We relied upon the work of Mr. Mandel and his staff, and have not independently verified or reviewed these results.

The assumptions used in the valuation were selected by the West Virginia Consolidated Public Retirement Board on the basis of experience studies and recommendations prepared by the Board Actuary. We believe that the assumptions used to calculate the liabilities are reasonable for the purposes of this report, in view of assumptions used to calculate liabilities for related systems. However, we did not make an in-depth investigation of their suitability for the purpose of this measurement.

The tables presented for DSRS in the actuarial section of this Comprehensive Annual Financial Report are based on information contained in the July 1, 2016 valuation report dated January 11, 2017 that was provided to us by the Board Actuary. These tables include:

#### **Financial Section**

#### **Actuarial Section**

- · Summary of Actuarial Assumptions and Methods
- · Schedule of Active Member Valuation Data
- Solvency Test
- · Schedule of Retirees and Beneficiaries
- Schedule of Funding Progress
- · Changes in Unfunded Actuarial Liability

West Virginia Deputy Sheriffs' Retirement System January 31, 2018 Page 2

Future actuarial measurements may differ significantly from current measurements due to system experience differing from that anticipated by the economic and demographic assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in system provisions, or applicable law or regulations. An analysis of the potential range of such future differences is beyond the scope of this valuation.

Where presented, references to "funded ratio" and "unfunded accrued liability" typically are measured on an actuarial value of assets basis. For DSRS, assets are valued at market for actuarial purposes. The funded ratio presented is appropriate for evaluating the need and level of future contributions, but makes no assessment regarding the funded status of the plan if the plan were to settle (i.e., purchase annuities to cover) a portion or all of its liabilities.

The results presented herewith were prepared solely for the Consolidated Public Retirement Board for the purposes herein stated and may not be appropriate to use for other purposes. Conduent does not intend to benefit and assumes no duty or liability to other parties who receive this work. Use of this report for any other purposes or by anyone other than the Consolidated Public Retirement Board and its auditors may not be appropriate and may result in mistaken conclusions because of failure to understand applicable assumptions, methods, or inapplicability of the report for that purpose. The attached pages should not be provided without a copy of this cover letter. No one may make any representations or warranties based on any statements or conclusions contained in this report without Conduent's prior written consent.

I am a Fellow of the Society of Actuaries and a Member of the American Academy of Actuaries. I meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained in this report. This report has been prepared in accordance with all applicable Actuarial Standards of Practice, and I am available to answer questions about it.

## SUMMARY OF ACTUARIAL METHODS AND ASSUMPTIONS

## Actuarial Valuation Date

The actuarial valuation is completed as of the first day of the plan year, July 1, 2016. Actuarial calculations verify the adequacy of the expected funding for the fiscal year corresponding to the plan year. The valuation is completed for the July 1 through June 30 plan year.

## **Actuarial Cost Method**

The valuation is completed applying the Entry Age Cost Method with Aggregate Normal Cost. The Actuarial Accrued Liability and the Normal Cost are determined on a level percentage of aggregate payroll funding basis.

Under the method, the Actuarial Accrued Liability is determined on an individual basis as a level percentage of payroll for each member. Inactive liabilities are valued on an accrued benefit basis.

The Total Normal Cost percentage of payroll requirement is calculated by dividing the excess of the Actuarial Present Value of Future benefits over the Actuarial Accrued Liability on an aggregate basis by the aggregate Present Value of Future Compensation for all active members. The Employer Normal Cost Percentage is calculated by subtracting the member contribution rate from the Total Normal Cost Percentage. The Employer Normal Cost is the Employer Normal Cost Percentage multiplied by the expected payroll for the valuation year.

#### **Asset Valuation Method**

Trust Fund assets are valued at the reported market value of assets as of the actuarial valuation date. The market value includes accrued amounts as reflected in the annual accounting for the Trust Fund.

#### Amortization Method for Funding

The funding target for DSRS is that the Unfunded Actuarial Accrued Liabilities are fully amortized by the end of fiscal year 2029. Amortization payments are calculated in the aggregate to remain a level percentage of future expected DSRS payroll determined on an open group projected payroll basis.

## Interest Return and Discount Rate

The interest rate assumption is a net return rate of 7.50% annually, net of investment and administrative expenses. The rate is applied to the interest return on Trust Fund assets as well as the discount rate on future expected benefit payments.

#### Healthy Life Mortality Rates

Active members mortality use the RP-2000 Non-Annuitant Mortality Table with mortality improvements projected to 2020 by Scale BB, with separate rates used for males and females. The projection year reflects additional law enforcement profession related mortality risks.

Retired members' and their beneficiaries' mortality is the RP-2000 Healthy Annuitant Mortality Table with mortality improvements projected to 2025 by Scale BB, with separate rates used for males and females.

#### **Disability Retirees Mortality Rates**

Members receiving disability retirement benefits mortality is the RP-2000 Healthy Annuitant Mortality Table projected to 2025 by Scale BB, set forward 1 year and with separate rates used for males and females.

## Salary Scale

An annual salary increase rate of 5.0% in each of the first two years of service, decreasing to 4.5% for years three through five, 4.0% for years six through ten years and 3.5% for all years of service in excess of the first ten years.

## **Payroll Growth Rate**

The total annual payroll for the active membership is assumed to increase at 3.5% per year for salary increase growth plus 1.5% per year for membership growth resulting in a total annual growth of 5.0%. This open group growth rate is applied in determining the percentage of payroll amortization requirements under the targeted DSRS funding of the UAAL by the end of Fiscal Year 2029. This growth rate includes projected newly hired deputy sheriffs and is an open group payroll projection rate.

## Withdrawal Rates

Withdrawal rates predict termination of employment prior to unreduced retirement eligibility. A sample of withdrawal rates by age are:

|     | Rate of    |
|-----|------------|
| Age | Withdrawal |
| 30  | 0.0880     |
| 40  | 0.0528     |
| 50  | 0.0176     |
| 55  | 0.0000     |

## **Disability Rates**

Disability rates predict an active member becoming disabled prior to unreduced retirement eligibility. A sample of disability rates by age are:

|     | Rate of    |  |
|-----|------------|--|
| Age | Withdrawal |  |
| 30  | 0.0020     |  |
| 40  | 0.0060     |  |
| 50  | 0.0040     |  |
| 51+ | 0.0040     |  |

## **Disability Rates - Type of Disability**

It is assumed that members eligible for unreduced retirement will elect retirement prior to becoming disabled. It is also assumed that retired members will not become disabled following retirement due to duty related causes incurred prior to retirement.

Disability retirement benefits vary by type of disability. Disability retirements are assumed to break down in the following types:

| Duty Related Full Disability    | 50% |
|---------------------------------|-----|
| Duty Related Partial Disability | 25% |
| Non-Duty Full Disability        | 20% |
| Non-Duty Partial Disability     | 5%  |

#### Marriage Rate and Composition

In determining the value of pre-retirement spousal death benefits, it is assumed that 90% of all members will be married at death. Males are assumed to be three years older than their female spouse.

#### Accrual of Future Service

Employment as a deputy sheriff is considered a full time professional position. All active members are assumed to complete sufficient hours to accrue one year of service in each future year of employment.

#### Non-Contributory Service Credits for Military Service and Unused Leave at Retirement

At Normal or Early retirement, a member is assumed to be granted 1.25 additional years of service for benefits due to allowable military service, plus 1.50 additional years for unused annual leave and/or unused sick leave for a total of 2.75 additional years.

#### **Retirement Rates**

Members who become eligible for unreduced retirement benefits prior to age 65 are assumed to have a 20% probability of retiring in the year they first become eligible. For years following the year of first eligibility and prior to attaining age 65, an additional 20% are assumed to retire each year. At 65, 100% of remaining members are assumed to retire.

Members who become eligible for unreduced retirement benefits on or after the attainment of age 65 are assumed to retire in the year they first become eligible.

#### **Plan Contributions**

Member and employer contributions are calculated as a percentage of total members' payroll. Amounts are deposited to the Trust Fund on a monthly basis. For interest calculation purposes, all amounts are treated as being deposited on an average of half way through the Plan year.

#### Fee Contributions under Section 7-14E-2

A portion of fees generated by each sheriff department for reports are contributed to the DSRS Trust Fund. Fees are deposited throughout the year. For interest calculation purposes they are treated as being deposited on an average of half way through the Plan year.

Fees are estimated based upon historical amounts contributed to the Trust Fund. Total deposits for last year were \$467,000. For the purposes of analyzing the adequacy of total funding for DSRS in meeting the DSRS funding target, an average annual fee income of \$510,000 has been assumed to continue in this and all future years.

#### Schedule of Active Member Valuation Data

| Valuation Date | Number | Annual Payroll | Annual Average Pay | % Increase<br>in Average Pay | Number of<br>Employers |
|----------------|--------|----------------|--------------------|------------------------------|------------------------|
| 6/30/2016      | 1,042  | \$ 51,004,000  | \$ 48,948          | 2.1%                         | 55                     |

West Virginia Judges' Retirement System West Virginia Consolidated Public Retirement Board 4101 MacCorkle Avenue, SE Charleston, WV 25304

Dear Board Members:

We performed the annual actuarial valuation of the West Virginia Judges' Retirement System (JRS) as of July 1, 2016. The purpose of the actuarial valuation is to determine the actuarial liabilities for the System for funding purposes and to determine if the expected contributions will be sufficient to meet or exceed the System's long term funding policy.

The valuation was based on membership data as of June 30, 2016, maintained by the West Virginia Consolidated Public Retirement Board, and unaudited financial information received from the West Virginia Investment Management Board.

The tables presented for JRS in the actuarial section of this Comprehensive Annual Financial Report are based on information contained in our July 1, 2016 valuation report dated March 31, 2017. These tables include:

- · Schedule of Retirees and Beneficiaries
- Schedule of Funding Progress
- Changes in Unfunded Actuarial Liability

This report presents fairly the actuarial position of Judges' Retirement System as of July 1, 2016, in accordance with Actuarial Standards of Practice (ASOPs) applied on a basis consistent with that of the preceding valuation. In my opinion, the assumptions used in preparing the liabilities and costs are individually reasonable with respect to Judges' Retirement System experience and represent my best estimate of anticipated future experience of the System. The assumptions were developed in accordance with the guidance set forth in applicable Actuarial Standards of Practice, including ASOPs

West Virginia Judges' Retirement System January 31, 2018 Page 2

27 and 35. In particular, the mortality assumptions were developed in accordance with the recommendation that an appropriate margin for future improvement in mortality beyond the measurement date be included.

Future actuarial measurements may differ significantly from current measurements due to system experience differing from that anticipated by the economic and demographic assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in system provisions, or applicable law or regulations. An analysis of the potential range of such future differences is beyond the scope of this valuation.

Where presented, references to "funded ratio" and "unfunded accrued liability" typically are measured on a market value of assets basis. The funded ratio presented is appropriate for evaluating the need and level of future contributions, but makes no assessment regarding the funded status of the plan if the plan were to settle (i.e., purchase annuities to cover) a portion or all of its liabilities.

The results presented herewith were prepared solely for the Consolidated Public Retirement Board for the purposes herein stated and may not be appropriate to use for other purposes. Conduent does not intend to benefit and assumes no duty or liability to other parties who receive this work. Use of this report for any other purposes or by anyone other than the Consolidated Public Retirement Board and its auditors may not be appropriate and may result in mistaken conclusions because of failure to understand applicable assumptions, methods, or inapplicability of the report for that purpose. The attached pages should not be provided without a copy of this cover letter. No one may make any representations or warranties based on any statements or conclusions contained in this report without Conduent's prior written consent.

I am a Fellow of the Society of Actuaries and a Member of the American Academy of Actuaries. I meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained in this report. This report has been prepared in accordance with all applicable Actuarial Standards of Practice, and I am available to answer questions about it.

#### SUMMARY OF ACTUARIAL METHODS AND ASSUMPTIONS

Valuation Date: July 1, 2016

#### Funding Method and Basis for Assumptions

The valuation is prepared under the Entry Age Normal Cost Method with individually computed accrued liabilities. The Normal Cost is computed in aggregate. Entry is based on date of hire. Active liabilities include amounts calculated for judges currently participating in the Public Employees' Retirement System (PERS) who may in the future transfer into the Judges' Retirement System (JRS) with an adjustment for the anticipated transfer of required member contributions.

Experience studies are performed at least once in every five-year period. This valuation was prepared on the basis of assumptions that were recommended to and adopted by the Board based on the experience study covering the period from July 1, 2006, to June 30, 2011. These assumptions will remain in effect for valuation purposes until such time as the Board adopts revised assumptions.

#### Interest Rate and Expenses

The valuation interest assumption is 7.50% per annum, with no loading for plan expenses.

#### Salary Scale

4.25% annually from the current valuation date. Increases are assumed to be delayed, occurring every few years. Missed increases are assumed to be made up at the CPI-U inflation rate for such missed year not less than 0%, but not more than the 3.0% inflation rate assumption. The valuation year salary scale increase of 4.25% is adjusted to include the missed inflation increases at the end of the valuation year. The most recent pay increase occurred at July 1, 2011.

#### Automatic Cost-of-Living Increases to Pensions

Pensions for judges appointed or elected prior to July 2, 2005 are assumed to increase at the same time as active salaries increase, and by the same percentage.

#### Post-Retirement Mortality

Post-retirement mortality tables are as follows:Healthy:RP-2000 Healthy Annuitant tables, projected to 2025 with Scale BBDisabled:RP-2000 Healthy Annuitant tables, projected to 2025 with Scale BB, set forward 1 year

#### **Pre-Retirement Mortality**

No pre-retirement mortality is assumed due to the small number of active members.

#### Withdrawal from Service

No withdrawal is assumed due to the small number of active members.

#### **Retirement Rates and Service**

For those eligible to retire prior to age 65, 5% are assumed to retire each year through age 64 with 100% retiring at age 65. For those first eligible at age 65 or later, 100% are assumed to retire when they become eligible.

# **Transfers from PERS**

It is assumed that all judges in PERS who earn sufficient service to vest under JRS will join JRS. Liabilities for potential transfers from PERS are included in this valuation and are calculated as if the judge had always been a member of JRS. Accumulated member contributions under PERS are treated as an offset to plan liabilities for valuation purposes. The shortfall of PERS accumulated member contributions versus the amount they would have contributed under the plan had they always been a participant under JRS is recognized in the development of the normal cost.

#### Family Composition

All judges are assumed to be married. Where spousal data is not available, it is assumed that male judges are five years older than their spouses and female judges are five years younger than their spouses. Surviving children's benefits were not explicitly valued.

#### Asset Valuation Method

Assets for valuation purposes are included at Market Value.

#### **Plan Contributions**

Plan contributions, both employee and employer, are assumed to be paid in the middle of the year.

West Virginia Emergency Medical Services Retirement System West Virginia Consolidated Public Retirement Board 4101 MacCorkle Avenue, SE Charleston, WV 25304

Dear Board Members:

An annual actuarial valuation of Emergency Medical Services Retirement System (EMSRS) was prepared as of July 1, 2016. The purpose of the actuarial valuation is to determine the actuarial liabilities for the System for funding purposes and to determine if the expected contributions will be sufficient to meet or exceed the System's long term funding policy. Results of this valuation were provided to us by the West Virginia Consolidated Public Retirement Board and developed under the supervision of Harry W. Mandel, a member of the American Academy of Actuaries who served as Board Actuary. We relied upon the work of Mr. Mandel and his staff, and have not independently verified or reviewed these results.

The assumptions used in the valuation were selected by the West Virginia Consolidated Public Retirement Board on the basis of experience studies and recommendations prepared by the Board Actuary. We believe that the assumptions used to calculate the liabilities are reasonable for the purposes of this report, in view of assumptions used to calculate liabilities for related systems. However, we did not make an in-depth investigation of their suitability for the purpose of this measurement.

The tables presented for EMSRS in the actuarial section of this Comprehensive Annual Financial Report are based on information contained in the July 1, 2016 valuation report dated January 25, 2017 that was provided to us by the Board Actuary. These tables include:

- · Schedule of Retirees and Beneficiaries
- Schedule of Funding Progress
- Changes in Unfunded Actuarial Liability

West Virginia Emergency Medical Services Retirement System January 31, 2018 Page 2

Future actuarial measurements may differ significantly from current measurements due to system experience differing from that anticipated by the economic and demographic assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in system provisions, or applicable law or regulations. An analysis of the potential range of such future differences is beyond the scope of this valuation.

Where presented, references to "funded ratio" and "unfunded accrued liability" typically are measured on an actuarial value of assets basis. For EMSRS, assets are valued at market for actuarial purposes. The funded ratio presented is appropriate for evaluating the need and level of future contributions, but makes no assessment regarding the funded status of the plan if the plan were to settle (i.e., purchase annuities to cover) a portion or all of its liabilities.

The results presented herewith were prepared solely for the Consolidated Public Retirement Board for the purposes herein stated and may not be appropriate to use for other purposes. Conduent does not intend to benefit and assumes no duty or liability to other parties who receive this work. Use of this report for any other purposes or by anyone other than the Consolidated Public Retirement Board and its auditors may not be appropriate and may result in mistaken conclusions because of failure to understand applicable assumptions, methods, or inapplicability of the report for that purpose. The attached pages should not be provided without a copy of this cover letter. No one may make any representations or warranties based on any statements or conclusions contained in this report without Conduent's prior written consent.

I am a Fellow of the Society of Actuaries and a Member of the American Academy of Actuaries. I meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained in this report. This report has been prepared in accordance with all applicable Actuarial Standards of Practice, and I am available to answer questions about it.

# SUMMARY OF ACTUARIAL METHODS AND ASSUMPTIONS

#### Actuarial Valuation Date

The initial actuarial valuation was completed on the effective date of the plan, January 1, 2008. Subsequent fiscal year valuations are completed each July 1 for the July 1 through June 30 year. This valuation was completed as of July 1, 2016.

#### Actuarial Cost Method

The valuation is completed applying the Entry Age Normal Cost Method with Aggregate Normal Cost determination. The Actuarial Accrued Liability and the Normal Cost are determined on a level percentage of aggregate expected future payroll basis.

The Actuarial Accrued Liability is determined on an individual basis as a level percentage of expected payroll for each member. Inactive liabilities are valued on an accrued benefit basis.

The Total Normal Cost percentage of payroll requirement is calculated by dividing the excess of the Actuarial Present Value of Future benefits over the Actuarial Accrued Liability on an aggregate basis by the aggregate Present Value of Future Compensation for all active members. The Employer Normal Cost Percentage is calculated by subtracting the member contribution rate from the Total Normal Cost Percentage. The Employer Normal Cost is the Employer Normal Cost Percentage multiplied by the expected payroll for the valuation year.

#### Asset Valuation Method

Trust Fund assets are valued at the reported market value of assets reported by the West Virginia Investment Management Board for the Trust Fund as of the actuarial valuation date. The market value includes accrued amounts as reflected in the annual accounting for the Trust Fund and included in the CPRB annual report.

#### Amortization Method for Funding

The funding target for EMSRS is an Actuarial Required Contribution equal to the Employer Normal Cost plus amortization of the UAAL. The initial UAAL and subsequent experience through June 30, 2028 is to be fully amortized over 30 years from July 1, 2008 through June 30, 2038. Amortization payments are calculated as a level dollar amount each year over the remainder of the initial 30 year period. Experience on and after June 30, 2028 is amortized as a separate amortization item over 10 years from its determination.

Contributions in excess of the ARC, if any, shall be applied to improve the funded percentage of EMSRS until an actuarially acceptable funding level has been attained.

#### Interest Return and Discount Rate

The interest rate assumption is a net return rate of 7.50% annually, net of investment and administrative expenses. The rate is applied for both the net investment return expected to be earned on Trust Fund assets and the discount rate on expected future benefit payments.

# Healthy Life Mortality Rates (Modified July 1, 2013)

Active members' mortality use the RP-2000 Non-Annuitant Table projected to 2020 by Scale BB. Inactive, regular retiree and beneficiary members' mortality use the RP-2000 Healthy Annuitant Mortality Table projected to 2025 by Scale BB, with separate rates used for males and females.

# Disability Retirees Mortality Rates (Modified July 1, 2013)

Members receiving disability retirement benefits use the RP-2000 Healthy Annuitants Mortality Table projected to 2025 by Scale BB, set forward of 1 year and with separate rates used for males and females.

#### Salary Scale (Modified July 1, 2013)

Annual salary increases are assumed by age on a unisex basis. Sample annual salary increases are as follows:

| Age      | Rate  |
|----------|-------|
| Under 31 | 4.75% |
| 40       | 4.00% |
| 50       | 3.75% |
| 60       | 3.50% |

# **Payroll Growth Rate**

Total annual payroll for the active membership is assumed to increase at 3.0% annually. This growth rate includes projected new hires and is an open group payroll projection rate. This open group growth rate is applied in certain projections contained in the actuarial valuation report tables. The rate does not impact EMSRS liabilities nor the ARC.

# Withdrawal Rates (Modified July 1, 2013)

Withdrawal rates predict termination of employment prior to unreduced retirement eligibility. A sample of unisex rates by age are:

| Age | Rate   |
|-----|--------|
| 30  | 0.0950 |
| 40  | 0.0650 |
| 50  | 0.0400 |
| 55  | 0.0000 |

# Disability Rates (Modified July 1, 2013)

Disability rates predict an active member becoming disabled prior to unreduced retirement eligibility. A sample of disability rates by age and sex are:

| Age |     | Males   | Females |  |
|-----|-----|---------|---------|--|
|     | 30  | 0.00030 | 0.00060 |  |
|     | 40  | 0.00113 | 0.00113 |  |
|     | 50  | 0.00488 | 0.00225 |  |
|     | 51+ | 0.00525 | 0.00285 |  |
|     |     |         |         |  |

It is assumed that members eligible for unreduced retirement will elect retirement prior to becoming disabled. It is also assumed that retired members will not become disabled following retirement due to duty related causes incurred prior to retirement.

Disability retirement benefits vary by duty and non-duty causes. Disability retirements are assumed to occur in the following percentages:

Duty Related Disability 50% Non-Duty Disability 50%

#### Marriage Rate and Composition

In determining the value of pre-retirement spousal death benefits, it is assumed that 80% of all members will be married at death. Males are assumed to be three years older than their female spouse.

#### Cause of Death for Death Benefits

Deaths from active employment are assumed to be from duty related causes 25% of the time with non- duty causes accounting for the remaining 75%.

#### Accrual of Future Service

EMSRS employment is considered a full time professional position. All active members are assumed to complete sufficient hours to accrue one year of service in each future year of employment.

#### Non-Contributory Service Credits for Military Service and Unused Leave at Retirement

At Normal or Early retirement, members are assumed to convert a part of their unused sick leave to additional retirement service credits. In addition, allowable military service credits are expected to be claimed for qualifying members. It is assumed that male members will be credited with an additional 7% of their contributory service credits and female members will be credited with an additional 1.75% of their contributory service credits.

#### **Retirement Rates**

Members who become eligible for unreduced retirement benefits prior to age 65 are assumed to have a 30% probability of retiring in the year they first become eligible. For years following the year of first eligibility and prior to attaining age 65, an additional 20% are assumed to retire each year. At 65, 100% of remaining members are assumed to retire.

Members who first become eligible for unreduced retirement benefits on or after the attainment of age 65 are assumed to retire in the year they first become eligible.

# Plan Contributions

Member and employer contributions are calculated as a percentage of total members' payroll. Amounts are deposited to the Trust Fund on a monthly basis. For interest calculation purposes, all amounts are treated as being deposited on an average of half way through the Plan year.

The EMSRS was established January 2008.

#### Schedule of Active Member Valuation Data

January 31, 2018

West Virginia Municipal Police and Fire Retirement System West Virginia Consolidated Public Retirement Board 4101 MacCorkle Avenue, SE Charleston, WV 25304

Dear Board Members:

An annual actuarial valuation of Municipal Police and Fire Retirement System (MPFRS) was prepared as of July 1, 2016. The purpose of the actuarial valuation is to determine the actuarial liabilities for the System for funding purposes and to determine if the expected contributions will be sufficient to meet or exceed the System's long term funding policy. Results of this valuation were provided to us by the West Virginia Consolidated Public Retirement Board and developed under the supervision of Harry W. Mandel, a member of the American Academy of Actuaries who served as Board Actuary. We relied upon the work of Mr. Mandel and his staff, and have not independently verified or reviewed these results.

The assumptions used in the valuation were selected by the West Virginia Consolidated Public Retirement Board on the basis of experience studies and recommendations prepared by the Board Actuary. We believe that the assumptions used to calculate the liabilities are reasonable for the purposes of this report, in view of assumptions used to calculate liabilities for related systems. However, we did not make an in-depth investigation of their suitability for the purpose of this measurement.

The tables presented for MPFRS in the actuarial section of this Comprehensive Annual Financial Report are based on information contained in the July 1, 2016 valuation report dated January 5, 2017 that was provided to us by the Board Actuary. These tables include:

#### **Financial Section**

#### **Actuarial Section**

- · Summary of Actuarial Assumptions and Methods
- · Schedule of Active Member Valuation Data
- Solvency Test
- Schedule of Retirees and Beneficiaries
- Schedule of Funding Progress
- · Changes in Unfunded Actuarial Liability

West Virginia Municipal Police and Fire Retirement System January 31, 2018 Page 2

Future actuarial measurements may differ significantly from current measurements due to system experience differing from that anticipated by the economic and demographic assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in system provisions, or applicable law or regulations. An analysis of the potential range of such future differences is beyond the scope of this valuation.

Where presented, references to "funded ratio" and "unfunded accrued liability" typically are measured on an actuarial value of assets basis. For MPFRS, assets are valued at market for actuarial purposes. The funded ratio presented is appropriate for evaluating the need and level of future contributions, but makes no assessment regarding the funded status of the plan if the plan were to settle (i.e., purchase annuities to cover) a portion or all of its liabilities.

The results presented herewith were prepared solely for the Consolidated Public Retirement Board for the purposes herein stated and may not be appropriate to use for other purposes. Conduent does not intend to benefit and assumes no duty or liability to other parties who receive this work. Use of this report for any other purposes or by anyone other than the Consolidated Public Retirement Board and its auditors may not be appropriate and may result in mistaken conclusions because of failure to understand applicable assumptions, methods, or inapplicability of the report for that purpose. The attached pages should not be provided without a copy of this cover letter. No one may make any representations or warranties based on any statements or conclusions contained in this report without Conduent's prior written consent.

I am a Fellow of the Society of Actuaries and a Member of the American Academy of Actuaries. I meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained in this report. This report has been prepared in accordance with all applicable Actuarial Standards of Practice, and I am available to answer questions about it.

#### SUMMARY OF ACTUARIAL METHODS AND ASSUMPTIONS

#### Actuarial Valuation Date

The initial actuarial valuation was completed on July 1, 2010, the first fiscal year with active members following the January 1, 2010 effective date. Subsequent valuations are completed each July 1 and this valuation was performed as of July 1, 2016.

#### Actuarial Cost Method

The valuation is completed applying the Entry Age Normal Cost Method with Aggregate Normal Cost determination. The Actuarial Accrued Liability and the Normal Cost are determined on a level percentage of aggregate expected future payroll.

Under the method, the Actuarial Accrued Liability is determined on an individual basis as a level percentage of expected compensation for each member. Inactive liabilities are valued on an accrued benefit basis.

The Total Normal Cost percentage of payroll requirement is calculated by dividing the excess of the Actuarial Present Value of Future benefits over the Actuarial Accrued Liability on an aggregate basis by the aggregate Present Value of Future Compensation for all active members. The Employer Normal Cost Percentage is calculated by subtracting the member contribution rate from the Total Normal Cost Percentage. The Employer Normal Cost is the Employer Normal Cost Percentage multiplied by the expected payroll for the valuation year.

#### Asset Valuation Method

Trust Fund assets are valued at the reported market value of assets reported by the Investment Management Board for the Trust Fund as of the actuarial valuation date. The market value includes accrued amounts as reflected in the annual accounting for the Trust Fund and included in the CPRB annual report.

#### Amortization Method for Funding

The funding target (the ARC) for MPFRS is equal to the Employer Normal Cost plus amortization of the UAAL. The initial UAAL was to be fully amortized over 30 years from July 1, 2010. Amortization payments were calculated as a level dollar amount each year over the 30 year period. Experience at July 1, 2016 demonstrates that the AAL was fully funded and that amortization for an UAAL component does not apply.

Contributions in excess of the ARC, if any, shall be applied to improve the funded percentage of MPFRS until an actuarially acceptable funding level has been attained.

#### Interest Return and Discount Rate

The interest rate and return rate assumption is 7.50% annually, net of investment and administrative expenses. This rate is applied for both the net interest return expected to be earned on Trust Fund assets and the annual discount rate on expected future benefit payments.

# Healthy Life Mortality Rates (Effective July 1, 2013)

Active members' mortality use the RP-2000 Non-annuitant Mortality Table projected to 2020 by Scale BB, with separate rates used for males and females. Retired members' mortality use the RP-2000 Healthy Annuitant Mortality Table projected to 2025 by Scale BB, with separate rates used for males and females.

# Disability Retirees Mortality Rates (Effective July 1, 2013)

Members receiving disability retirement benefits mortality use the RP-2000 Healthy Annuitant Mortality Table projected to 2025 by Scale BB, set forward 1 year, with separate rates used for males and females.

#### Salary Scale (Modified July 1, 2013)

Annual salary increases are assumed by age on a unisex basis with sample annual salary increases as follows:

| Age      | Rate  |
|----------|-------|
| Under 31 | 4.75% |
| 40       | 4.00% |
| 50       | 3.75% |
| 60       | 3.50% |

#### Payroll Growth Rate

Total annual payroll for the active membership is assumed to increase at 3.0% annually. This growth rate is applied in certain projections contained in the actuarial valuation report tables. The rate does not impact MPFRS liabilities nor the ARC. The growth rate was set based on current limited employer participation in MPFRS. The growth rate will need to be increased if additional employers begin participating in MPFRS.

#### Withdrawal Rates (Modified July 1, 2013)

Withdrawal rates predict termination of employment prior to unreduced retirement eligibility. A sample of unisex rates by age are:

| Age | Rate   |
|-----|--------|
| 30  | 0.0950 |
| 40  | 0.0650 |
| 50  | 0.0400 |
| 55  | 0.0000 |

# Disability Rates (Adopted July 1, 2013)

Disability rates predict an active member becoming disabled prior to unreduced retirement eligibility. A sample of disability rates by age and sex are:

| Age | Males   | Females |
|-----|---------|---------|
| 30  | 0.00200 | 0.00220 |
| 40  | 0.00600 | 0.00600 |
| 50  | 0.00400 | 0.00400 |
| 51+ | 0.00400 | 0.00400 |

It is assumed that members eligible for unreduced retirement will elect retirement prior to becoming disabled. It is also assumed that retired members will not become disabled following retirement due to duty related causes incurred prior to retirement.

Disability retirement benefits vary by duty and non-duty causes. Disability retirements are assumed to occur in the following percentages:

| Duty Related Disability | 75% |
|-------------------------|-----|
| Non-Duty Disability     | 25% |

# Marriage Rate and Composition (Modified July 1, 2013)

In determining the value of pre-retirement spousal death benefits, it is assumed that 90% of all members will be married at death. Males are assumed to be three years older than their female spouse.

#### Cause of Death for Death Benefits

Deaths from active employment are assumed to be from duty related causes 25% of the time with non- duty causes accounting for the remaining 75%.

#### Accrual of Future Service

MPFRS employment is considered a full time professional position. All active members are assumed to complete sufficient hours to accrue one year of service in each future year of employment.

#### Non-Contributory Service Credits for Military Service

At Normal retirement, qualifying members are assumed to claim up to 2 allowable military service years as additional retirement service credits. It is assumed that male members will be credited with an additional 2.0% of their contributory service credits and female members will be credited with an additional 0.5% of their contributory service credits.

#### Retirement Rates (Modified July 1, 2013)

Members who become eligible for unreduced retirement benefits prior to age 65 are assumed to have a 20% probability of retiring in the year they first become eligible. For years following the year of first eligibility and prior to attaining age 65, an additional 20% are assumed to retire each year. At 65, 100% of remaining members are assumed to retire.

Members who first become eligible for unreduced retirement benefits on or after the attainment of age 65 are assumed to retire in the year they first become eligible.

#### Plan Contributions

Member and employer contributions are calculated as a percentage of total members' payroll. Amounts are deposited to the Trust Fund on a monthly basis. For interest calculation purposes, all amounts are treated as being deposited on an average of half way through the Plan year.

The MPFRS was established January 2010.

#### Schedule of Active Member Valuation Data

# Schedule of Contributions

The Schedule of Contributions is included in the Required Supplementary Information provided in the Financial Section of this Comprehensive Annual Financial Report.

#### **Plan Provisions**

A discussion of plan provisions is included in Note 2 to the financial statements included in the Financial Section.

# STATISTICAL SECTION

The statistical section of the comprehensive annual financial report provides information to the reader to assist in understanding the information in the financial statements, note disclosures, and required supplementary information regarding the Retirement Systems' overall financial health. The information in this section is obtained from comprehensive annual financial reports and other internal sources.

#### **Financial Trends**

These schedules contain trend information to help the reader understand how the Retirement Systems' financial performance has changed over time.

- Additions by Source, Deductions by Type, and Changes in Plan Net Position
- Benefit by Type

#### **Retirees and Beneficiaries**

These schedules provide information concerning the retirees and beneficiaries receiving benefits.

- Retired Members by Type of Benefit
- Average Monthly Benefit Payments

#### **Participating Units**

This schedule provides information concerning units participating in the various Retirement Systems.

The TDCRS is a multiple employer defined contribution retirement system, which is a money purchase pension plan covering primarily full-time employees of the State's 55 county public school systems, the State Department of Education, and the Schools for the Deaf and Blind who were hired between July 1, 1991 and June 30, 2005. TDCRS benefits depend solely on amounts contributed to the plan plus investment earnings. TDCRS closed participation to new members effective June 30, 2005.

In 2008, the West Virginia Legislature provided an opportunity for members of the TDCRS to elect to transfer to the West Virginia Teachers' Retirement System (TRS). The transfer occurred on July 1, 2008 and a total of 15,152 TDCRS members transferred to TRS.

#### STATISTICAL SECTION Benefits by Type

The following schedules provide information on the benefits provided by type of benefit for each plan.

# Municipal Police Officers and Firefighters Retirement System

This plan was established January 2010.

The following schedules provide information on the average monthly benefit payments. These schedules exclude participants retiring with a reduced early retirement benefit with less than 10 years service. Due to the nature, design and resulting limitations of our recently retired computerized benefit system, the data for the final average salary for retirees is not available. At the end of the second quarter of 2017, a new modern benefit system was implemented. The final average salary information will be available prospectively starting with fiscal year ending June 30, 2018.
